

1 AMENDMENT TO SENATE BILL 686

2 AMENDMENT NO. _____. Amend Senate Bill 686 as follows:

3 on page 8, by replacing lines 6 through 14 with the
4 following:

5 "(g-5) Subsection 24-1(a)(6) does not apply to or affect
6 persons licensed under federal law to manufacture any device
7 or attachment of any kind designed, used, or intended for use
8 in silencing the report of any firearm, or ammunition for
9 those firearms equipped with those devices, and actually
10 engaged in the business of manufacturing those devices or
11 ammunition, but only with respect to activities that are
12 within the lawful scope of that business, such as the
13 manufacture, transportation, or testing of those devices or
14 ammunition. This exemption does not authorize the general
15 private possession of any device or attachment of any kind
16 designed, used, or intended for use in silencing the report
17 of any firearm, but only such possession and activities as
18 are within the lawful scope of a licensed manufacturing
19 business described in this subsection (g-5). During
20 transportation, those devices shall be detached from any
21 weapon or not immediately accessible."
