Casandra B. Watson

Dear Members of the General Assembly,

Public Act 100-0464 (SB1933), established Automatic Voter Registration (AVR), and mandates that the Illinois State Board of Elections submit an annual public report to the General Assembly and the Governor detailing the progress made towards implementing AVR. In addition to a progress update, this report shall provide certain statistics regarding AVR applications, as well as the number of those who submitted an application through the State Board of Elections' Online Voter Application (OVA) website (see 10ILCS 5/1A-16.7(o)). Enclosed herewith, please find an update on the progress to implement AVR at each designated AVR agency and the requested statistics for the period of December 1, 2019 through November 27, 2020.

If you have any questions regarding this report, please do not hesitate to contact me at dschultz@elections.il.gov or 217.782.1568.

Sincerely,

**Dustin Schultz** 

Election Specialist III/AVR Coordinator

Public Act 100-0464, otherwise known as Automatic Voter Registration (AVR) was signed into law by Governor Bruce Rauner on August 28, 2017. This report will overview the progress of the State Board of Elections' (SBE) efforts to implement AVR, as well as offer a status update for each agency required to participate in AVR.

The SBE has developed and offers three different platforms, batch, webservice, and website transfer, for agencies to submit voter registration application information to the SBE. Each agency is provided technical specifications for a batch, webservice, and website transfer connection so the agency is able to consider their current technological abilities and statutory requirements when determining which platform to connect with the SBE for registration application submission. Batch and webservice processing requires the agency to collect all relevant registration information, while a website transfer allows registration information to be transferred and pre-populated to the SBE online voter registration website for completion by the applicant.

In addition, the SBE has had to modify the statewide registration database, otherwise known as the Illinois Voter Registration System (IVRS) to accommodate applications submitted directly to the SBE from agencies. Prior to AVR, agencies such the Office of the Secretary of State (SOS) would submit voter registration applications directly from Driver Services facilities to one of 108 election authorities by a paper process through the United States Postal Service. This application process was an inefficient and time consuming method of registration that required each election authority to data enter the voter registration application information into their local registration database. The implementation of AVR has created an electronic pathway whereby all registration applications originating from an agency are transmitted directly to the SBE, who then immediately distributes the registration application to the appropriate election authority electronically. In order for the SBE to serve as a conduit of application information to election authorities, the data distribution portion of IVRS also had to be modified. One small such example is if an agency application does not have an electronic signature, the IVRS database is automatically searched for an existing registration that may be on file for the applicant from which the signature for the applicant can be obtained.

The numerous updates to IVRS required the SBE to update policies and procedures for election authorities to process electronic agency applications. The updated procedures for the registration of agency applications has been very well received by election authorities as each election authority no longer has to handle paper, and in many cases, no data entry is required on the part of the election authority due to connectivity between their local registration system and IVRS.

AVR also places additional requirements on the SBE. Some examples are to propose Administrative Rules, submit annual reports, and create website content about AVR. This annual report

will be the third annual AVR report submitted since AVR was enacted into law. Although progress to implement AVR at each required agency is ongoing in some cases, the SBE has met its AVR requirements and has fulfilled numerous audit requests pertaining to AVR implementation. Ongoing maintenance and enhancements continue constantly to improve the deployment of AVR by the SBE. The remainder of this report will overview implementation of AVR at each required agency.

## **Secretary of State (SOS)**

The Office of the Secretary of State (SOS) has played a key role in voter registration for many years due to requirements under the federal National Voter Registration Act (NVRA), however the AVR statute established several new requirements for the SOS. Most significantly are the directive to inform the applicant for services of their current voter registration status and the requirement to submit voter registration applications electronically to the SBE. As a result, voter registration has been completely incorporated into the Driver's Services process for the applicant. The SBE and SOS went to production with an electronic opt-in (whereby voters attest to eligibility) voter registration application process by the due date of July 2018. Unfortunately, opt-out registration (whereby applicants are automatically registered to vote unless they opt out) was not able to go into production until July 2019. This delay was due to the fusion of opt-out registration with the implementation of REAL ID and an adjustment to the intended implementation regarding SOS's front end processing. Over the past three years, the SBE and SOS have worked cooperatively to resolve any technical hurdles that have presented. As of this date, over 1,011,366 new or updated voter registration applications have been electronically transmitted to the SBE from the SOS. In addition, a data sharing agreement has been executed and jointly adopted rules have been submitted to the Joint Commission on Administrative Rules (JCAR), but have not been implemented due to ongoing litigation. SOS has reported that between December 1, 2019 through November 13, 2020, 330,232 people have opted out of voter registration while obtaining a REAL ID.

## **Department of Human Services (DHS)**

The Department of Human Services (DHS) is unique among the agencies required to connect for AVR because the statute specifically designated just two divisions within DHS (Family and Community Services and Rehabilitation Services) as being required to connect. Although communication began with DHS early in the fall of 2017, progress on implementing AVR with DHS was stalled until early summer of 2019. Since that time, however, a data sharing agreement was executed with DHS. DHS-Rehabilitation Services went to production with an AVR compliant web service connection utilizing optin registration and DHS- Family and Community Services implemented a website transfer mechanism

(whereby voter registration information is prepopulated into our online voter registration website) for their applicants utilizing their online process. DHS – Family and Community Services is currently considering their technical options for in person applications.

## **Department of Natural Resources (DNR)**

The SBE and the Department of Natural Resources (DNR) began discussing AVR soon after the initiation of AVR. DNR indicated the current agreement with their vendor for hunting and fishing license applications was near its end of life and as such they would not be able to initiate any required AVR changes within their current system. DNR would be looking to meet the AVR requirements through their new Enterprise Licensing System. The agreement for a statement of work on Enterprise has been delayed significantly and was agreed upon in August 2019. The SBE has been in discussions with DNR, and the Department of Innovation and Technology (DoIT) to incorporate a fully AVR compliant web service with the Enterprise system when it is released. DNR, in a good faith effort to comply with the spirit of AVR, was able to put into production a website transfer mechanism (whereby voter registration information is prepopulated into our online voter registration application website) for DNR's duck, goose, dove, upland game, and pheasant hunting license systems. In addition, DNR added functionality to their current hunting and fishing license application to uniquely link applicants to the SBE online voter registration website. The SBE and DNR have agreed on the principles for a data sharing agreement and DNR indicated a desire for DoIT to also be included as a party to the agreement. Said agreement is currently under review by DoIT.

## **Illinois Department of Financial and Professional Regulation (IDFPR)**

The SBE and IDFPR have held several discussions regarding the implementation of AVR. IDFPR has a good understanding of the requirements of AVR, but find themselves in the same position as DNR, with an end of life licensing system, and are awaiting the implementation of the Enterprise Licensing System. IDFPR has indicated a willingness to include the website transfer mechanism (whereby voter registration information is prepopulated into our online voter registration application website) with their current system and have been in discussions with their vendor to initiate the scope of work required.

#### **Illinois Department of Employment Security (IDES)**

The SBE and IDES have held discussions regarding AVR implementation. The SBE has provided IDES with technical specifications and a sample data sharing agreement. IDES has requested

www.elections.il.gov

to be the agency responsible for drafting the data sharing agreement, to which the SBE agreed. As recently as November 2, 2020, the SBE and IDES have reengaged discussions in an effort to bring IDES into compliance with the AVR statute.

## **Statistics**

The remainder of this annual report will provide certain statistics as required by 10ILCS 1A-16.7(o). Among the requirements are to provide the number of records transmitted to the SBE by agency, the number of new and updated voter registrations by agency, and the number of applications received through the online voter application (OVA) system. The number of persons who opted out of registration is also required to be reported. Since this information is collected by each agency, the number is reported with the agency update. SOS is the only agency participating in opt-out registration at this time, so the number of individuals who opted out of registration is only reported for SOS.
