

STATE OF ILLINOIS

LEGISLATIVE INFORMATION SYSTEM

2021-2022

April 1, 2023

**TO THE MEMBERS OF
THE 102nd GENERAL ASSEMBLY**

It is an honor to again submit the Biennial Report of the Legislative Information System (LIS). The System was created as a permanent service agency of the General Assembly in September 1977, and has carried on the tradition of providing information technology solutions to the Illinois General Assembly that was established by its predecessor agency, the Joint Committee on Legislative Information Systems. While much has changed in the field of information technology over the ensuing years, and the services provided and the means of providing them have changed, the Legislative Information System (LIS) has remained committed to its primary mission:

To apply information technology to the operations of the Illinois General Assembly to enable the legislative branch to perform its constitutional and statutory responsibilities.

This report presents an overview of LIS and the services it provides. It is submitted to the members of the General Assembly in accordance with the requirements of 25 ILCS 145/5.07 of the Illinois Compiled Statutes.

The systems used by the Illinois General Assembly are state-of-the-art and in the forefront of legislative information systems nationwide. The work done here is a model to other states and even other countries. More importantly, LIS continues to develop and enhance these systems as information technology progresses and provides opportunities to better serve the General Assembly.

I want to recognize and commend those who have made all this possible. I am proud of the staff we have at LIS and their abilities, efforts, and results. Their commitment to the Illinois General Assembly and our mission is evident in all they do. Not only are the services LIS provides the Illinois General Assembly among the leaders in this arena, our staff is second to none. I thank and applaud them for the success we have enjoyed.

Respectfully submitted,

Jarred Sampson, Executive Director
Legislative Information System

BACKGROUND AND HISTORY

The Legislative Information System is a legislative service agency created by the Illinois General Assembly with the primary responsibility for providing information technology services to the General Assembly and its committees, commissions, and agencies.

The creation of the System can be traced directly to the recommendations made in 1967 by the Illinois Commission on the Organization of the General Assembly. That commission identified several areas where data processing could be applied to improve the accuracy and availability of information to the General Assembly.

In 1969, the Joint Committee on Legislative Information Systems was established by joint resolution to provide coordination and systematic application of data processing to the General Assembly's needs. In 1969, a bill status system and a statute retrieval system were implemented and effectively used, followed by a bill drafting system in 1971. These applications were supported by the Illinois Department of Finance in conjunction with the Joint Committee on Legislative Information Systems.

In 1975, the General Assembly authorized the creation of its own data processing staff under the jurisdiction of the Joint Committee. The dependence of the General Assembly on the Department of Finance for the actual computer support continued, but the development of the applications and the provision of equipment and support required by the General Assembly were provided by the Joint Committee on Legislative Information Systems.

A major step was taken to provide the data processing support required to improve the operations of the legislative branch when the Legislative Information System was created as a permanent service agency of the Illinois General Assembly in 1977. A legislative computer facility was constructed, and in January 1979, all legislative computer services were transferred there.

Since that time, the services and solutions offered by LIS have expanded and evolved with the needs of the General Assembly and developments in information technology. This includes providing and maintaining an extensive and sophisticated networking and data processing infrastructure for the legislative branch. It also includes a continually growing list of systems and applications used by the various components of the General Assembly (see **Services**).

DUTIES AND RESPONSIBILITIES

The Legislative Information System is under the direction of the Joint Committee of Legislative Support Services. The Legislative Commission Reorganization Act of 1984 established that the System report to the Joint Committee as a legislative support services agency. The System's primary responsibility is to provide information technology services to the General Assembly, its committees, commissions, and agencies.

Public Act 80-683 (effective September 16, 1977), Public Act 86-1324 (eff. September 6, 1990), and Public Act 90-666 (eff. July 30, 1998) created the System and established the following duties and responsibilities:

- Establish offices in the State complex and provide such services as are required by the General Assembly.
- Study and make recommendations concerning the application of information technology to the varied services required by the General Assembly.
- Implement the recommendations made in Item 2 above as directed by the General Assembly.
- Host the complete text of the Administrative Rules in electronic form and cooperate with the Joint Committee on Administrative Rules and the Secretary of State in making that text available for use in publication of the Illinois Register and the Illinois Administrative Code.
- Provide information technology services for the Legislative Reference Bureau, the Commission on Government Forecasting and Accountability, the Clerk of the House of Representatives, and the Secretary of the Senate. Services are provided to other General Assembly committees, boards, agencies, and commissions within the resources available to the Legislative Information System.
- Make legislative information available to the public via the Internet.

MISSION STATEMENT AND OBJECTIVES

Based on the statutory directives, a mission statement has been adopted by LIS that defines its purpose. From this statement, general objectives have been developed that result in the services that LIS currently provides, an organization that carries out those services effectively, and a plan for upgrading and enhancing those services.

In keeping with the mission statement, the following objectives have been developed:

- Provide, maintain, and support the necessary hardware, software, and related infrastructure to enable the legislative branch to create, maintain, monitor, and utilize information related to its responsibilities.
- Research, recommend, and implement appropriate upgrades and enhancements to the information technology used by the legislative branch.

PLANNING

The System's plan consists of a mission statement that provides a general statement of Legislative Information System goals. From this statement, general objectives have been developed that put the mission statement into specific productive outputs resulting in a multi-year work plan.

The major focus of LIS is on operating and maintaining the existing applications/networks while implementing enhancements and upgrades. All applications/networks are constantly evaluated for effectiveness and performance. Communication is maintained with users to ensure that all needed and desired service is being provided. Change requests are acknowledged, investigated, and evaluated; if accepted, resources are scheduled leading to development and implementation of the request. Hardware and software are constantly monitored and evaluated as well; if changes or upgrades are needed, they are implemented according to available resources and in conjunction with ongoing operations.

All implementations are prioritized and scheduled around legislative session to ensure the least likelihood of negative impact. Priorities and schedules are constantly in a state of flux and continually updated due to the sporadic schedule and changing needs of the General Assembly.

In the event that funding levels for the overall block grant programs have not been made available by the federal government for the forthcoming fiscal year, the Advisory Committee on Block Grants shall provide percentage allocations for the various programs the committee has included within the program priorities for the individual block grants in lieu of recommended dollar allocations. The recommendations shall ensure that the maximum amount of funds estimated to be available to the State is set aside for program purposes and a minimum amount is set aside for administrative purposes.

(5) Following the initial submission of its recommendations to the General Assembly and Governor on May 1, to report to the House and Senate Appropriations Committees on a quarterly basis, and more frequently as they may request, changes in federal block grant program authorizations and funding levels which may require the General Assembly to adjust current year State appropriations.
