Report on the actuarial assumptions and valuations of the state-funded retirement systems, 2020

The report contains actuarial assumptions and valuations of 6 retirement systems: the 5 state-funded systems and the Public School Teachers’ Pension and Retirement Fund of Chicago. The report is based on reports prepared by the State Actuary, an actuarial and consulting firm called Cheiron. Actuarial assumptions used to calculate state contributions to the systems were found to be reasonable, but Cheiron recommended TRS lower its interest rate assumption to 6.75%. The firm also made recommendations related to disclosures, future valuations, and other topics. The proposed state contributions for FY 2022 are \$5.70 billion to TRS, \$2.47 billion to SERS, \$2.11 billion to SURS, \$0.15 billion to JRS, \$0.03 billion to GARS, and \$0.26 billion to CTPF—totaling \$10.72 billion.
