Passed the Senate, as amended, April 27, 2010.

Jillayne Rock, Secretary of the Senate

AMENDMENT NO. 1. Amend House Bill 4649 by replacing everything after the enacting clause with the following:

"Section 5. The Public Utilities Act is amended by changing Sections 8-406, 8-509, and 8-510 and by adding Section 8-406.1 as follows:

(220 ILCS 5/8-406) (from Ch. 111 2/3, par. 8-406)

Sec. 8-406. Certificate of public convenience and necessity.

(a) No public utility not owning any city or village franchise nor engaged in performing any public service or in furnishing any product or commodity within this State as of July 1, 1921 and not possessing a certificate of public convenience and necessity from the Illinois Commerce Commission, the State Public Utilities Commission or the Public Utilities Commission, at the time this amendatory Act of 1985 goes into effect, shall transact any business in this State until it shall have obtained a certificate from the Commission that public convenience and necessity require the transaction of such business.

(b) No public utility shall begin the construction of any new plant, equipment, property or facility which

is not in substitution of any existing plant, equipment, property or facility or any extension or alteration thereof or in addition thereto, unless and until it shall have obtained from the Commission a certificate that public convenience and necessity require such construction. Whenever after a hearing the Commission determines that any new construction or the transaction of any business by a public utility will promote the public convenience and is necessary thereto, it shall have the power to issue certificates of public convenience and necessity. The Commission shall determine that proposed construction will promote the public convenience and necessity only if the utility demonstrates: (1) that the proposed construction is necessary to provide adequate, reliable, and efficient service to its customers and is the least-cost means of satisfying the service needs of its customers or that the proposed construction will promote the development of an effectively competitive electricity market that operates efficiently, is equitable to all customers, and is the least cost means of satisfying those objectives; (2) that the utility is capable of efficiently managing and supervising the construction process and has taken sufficient action to ensure adequate and efficient construction and supervision thereof; and (3) that the utility is capable of financing the proposed construction without significant adverse financial consequences for the utility or its customers.

(c) After the effective date of this amendatory Act of 1987, no construction shall commence on any new nuclear power plant to be located within this State, and no certificate of public convenience and necessity or other authorization shall be issued therefor by the Commission, until the Director of the Illinois Environmental Protection Agency finds that the United States Government, through its authorized agency, has identified and approved a demonstrable technology or means for the disposal of high level nuclear waste, or until such construction has been specifically approved by a statute enacted by the General Assembly.

As used in this Section, "high level nuclear waste" means those aqueous wastes resulting from the operation of the first cycle of the solvent extraction system or equivalent and the concentrated wastes of the subsequent extraction cycles or equivalent in a facility for reprocessing irradiated reactor fuel and shall include spent fuel assemblies prior to fuel reprocessing.

(d) In making its determination, the Commission shall attach primary weight to the cost or cost savings to the customers of the utility. The Commission may consider any or all factors which will or may affect such cost or cost savings, including the public utility's engineering judgment regarding the materials used for construction.

(e) The Commission may issue a temporary certificate which shall remain in force not to exceed one year in cases of emergency, to assure maintenance of adequate service or to serve particular customers, without notice or hearing, pending the determination of an application for a certificate, and may by regulation exempt from the requirements of this Section temporary acts or operations for which the issuance of a certificate will not be required in the public interest.

A public utility shall not be required to obtain but may apply for and obtain a certificate of public convenience and necessity pursuant to this Section with respect to any matter as to which it has received the authorization or order of the Commission under the Electric Supplier Act, and any such authorization or order granted a public utility by the Commission under that Act shall as between public utilities be deemed to be, and shall have except as provided in that Act the same force and effect as, a certificate of public convenience and necessity issued pursuant to this Section.

No electric cooperative shall be made or shall become a party to or shall be entitled to be heard or to otherwise appear or participate in any proceeding initiated under this Section for authorization of power plant construction and as to matters as to which a remedy is available under The Electric Supplier Act.

(f) Such certificates may be altered or modified by the Commission, upon its own motion or upon application by the person or corporation affected. Unless exercised within a period of 2 years from the grant thereof authority conferred by a certificate of convenience and necessity issued by the Commission shall be null and void.

No certificate of public convenience and necessity shall be construed as granting a monopoly or an exclusive privilege, immunity or franchise.

(g) A public utility that undertakes any of the actions described in items (1) through (3) of this subsection (g) or that has obtained approval pursuant to Section 8-406.1 of this Act shall not be required to comply with the requirements of this Section to the extent such requirements otherwise would apply. For purposes of this Section and Section 8-406.1 of this Act, "high voltage electric service line" means an electric line having a design voltage of 100,000 or more. For purposes of this subsection (g), a public utility may do any of the following:

(1) replace or upgrade any existing high voltage electric service line and related facilities,

notwithstanding its length:

(2) relocate any existing high voltage electric service line and related facilities, notwithstanding its length, to accommodate construction or expansion of a roadway or other transportation infrastructure; or

(3) construct a high voltage electric service line and related facilities that is constructed solely to serve a single customer's premises or to provide a generator interconnection to the public utility's transmission system and that will pass under or over the premises owned by the customer or generator to be served or under or over premises for which the customer or generator has secured the necessary right of way.

Sec. 8-406.1. Certificate of public convenience and necessity; expedited procedure.

(a) A public utility may apply for a certificate of public convenience and necessity pursuant to this Section for the construction of any new high voltage electric service line and related facilities (Project). To facilitate the expedited review process of an application filed pursuant to this Section, an application shall include all of the following:

(1) Information in support of the application that shall include the following:

(A) A detailed description of the Project, including location maps and plot plans to scale showing all major components.

(B) The following engineering data:

(i) a detailed Project description including:

(I) name and destination of the Project;

(II) design voltage rating (kV);

(III) operating voltage rating (kV); and

(IV) normal peak operating current rating;

(VI) a list of the names of all new (and existing if applicable) substations or switching stations

that will be associated with the proposed new high voltage electric service line;

(iii) the location of the site and right-of-way including:

(I) miles of right-of-way;

(II) miles of circuit;

(III) width of the right-of-way; and

(IV) a brief description of the area traversed by the proposed high voltage electric service line, including a description of the general land uses in the area and the type of terrain crossed by the proposed line;

(iv) assumptions, bases, formulae, and methods used in the development and preparation of the diagrams and accompanying data, and a technical description providing the following information:

(I) number of circuits, with identification as to whether the circuit is overhead or underground;

(II) the operating voltage and frequency; and

(III) conductor size and type and number of conductors per phase;

(v) if the proposed interconnection is an overhead line, the following additional information also must be provided:

(I) the wind and ice loading design parameters;

(II) a full description and drawing of a typical supporting structure, including strength specifications;

(III) structure spacing with typical ruling and maximum spans;

(IV) conductor (phase) spacing; and

(V) the designed line-to-ground and conductor-side clearances;

(vi) if an underground or underwater interconnection is proposed, the following additional information also must be provided:

(III) cathodic protection scheme; and

(IV) type of dielectric fluid and safeguards used to limit potential spills in waterways;

(vii) technical diagrams that provide clarification of any item under this item (1) should be included; and

(viii) applicant shall provide and identify a primary right-of-way and one or more alternate rights-of-way for the Project as part of the filing. To the extent applicable, for each right-of-way, applicant shall provide the information described in this subsection (a). Upon a showing of good cause in its filing, an applicant may be excused from providing and identifying alternate rights-of-way.

(2) An application fee of \$100,000, which shall be paid into the Public Utility Fund at the time the Chief Clerk of the Commission deems it complete and accepts the filing.

(3) Information showing that the utility has held a minimum of 3 pre-filing public meetings to receive public comment concerning the Project in each county where the Project is to be located, no earlier than 6 months prior to the filing of the application. Notice of the public meeting shall be published in a newspaper of general circulation within the affected county once a week for 3 consecutive weeks, beginning no earlier than one month prior to the first public meeting. If the Project traverses 2 contiguous counties and where in one county the transmission line mileage and number of landowners over whose property the proposed route traverses is 1/5 or less of the transmission line mileage and number of such landowners of the other county, then the utility may combine the 3 pre-filing meetings in the county with the greater transmission line mileage and affected landowners. All other requirements regarding pre-filing meetings shall apply in both counties. Notice of the public meeting, including a description of the Project, must be provided in writing to the clerk of each county where the Project is to be located. A representative of the Commission shall be invited to each pre-filing public meeting.

(b) At the first status hearing the administrative law judge shall set a schedule for discovery that shall take into consideration the expedited nature of the proceeding.

(c) Nothing in this Section prohibits a utility from requesting, or the Commission from approving, protection of confidential or proprietary information under applicable law. The public utility may seek confidential protection of any of the information provided pursuant to this Section, subject to Commission approval.

(d) The public utility shall publish notice of its application in the official State newspaper within 10 days following the date of the application's filing.

(e) The public utility shall establish a dedicated website for the Project 3 weeks prior to the first public meeting and maintain the website until construction of the Project is complete. The website address shall be included in all public notices.

(f) The Commission shall, after notice and hearing, grant a certificate of public convenience and necessity filed in accordance with the requirements of this Section if, based upon the application filed with the Commission and the evidentiary record, it finds the Project will promote the public convenience and necessity and that all of the following criteria are satisfied:

(1) That the Project is necessary to provide adequate, reliable, and efficient service to the public utility's customers and is the least-cost means of satisfying the service needs of the public utility's customers or that the Project will promote the development of an effectively competitive electricity market that operates efficiently, is equitable to all customers, and is the least cost means of satisfying those objectives.

(2) That the public utility is capable of efficiently managing and supervising the construction process and has taken sufficient action to ensure adequate and efficient construction and supervision of the construction.

(3) That the public utility is capable of financing the proposed construction without significant adverse financial consequences for the utility or its customers.

(g) The Commission shall issue its decision with findings of fact and conclusions of law granting or denying the application no later than 150 days after the application is filed. The Commission may extend the 150-day deadline upon notice by an additional 75 days if, on or before the 30th day after the filing of the application, the Commission finds that good cause exists to extend the 150-day period.

(h) In the event the Commission grants a public utility's application for a certificate pursuant to this Section, the public utility shall pay a one-time construction fee to each county in which the Project is constructed within 30 days after the completion of construction. The construction fee shall be \$20,000 per mile of high voltage electric service line constructed in that county, or a proportionate fraction of that fee. The fee shall be in lieu of any permitting fees that otherwise would be imposed by a county. Counties receiving a payment under this subsection (h) may distribute all or portions of the fee to local taxing districts in that county.

(i) Notwithstanding any other provisions of this Act, a decision granting a certificate under this Section shall include an order pursuant to Section 8-503 of this Act authorizing or directing the construction of the high voltage electric service line and related facilities as approved by the Commission, in the manner and within the time specified in said order.

(220 ILCS 5/8-509) (from Ch. 111 2/3, par. 8-509)

Sec. 8-509. When necessary for the construction of any alterations, additions, extensions or improvements ordered or authorized under Section 8-406.1, 8-503, or 12-218 of this Act, any public utility may enter upon, take or damage private property in the manner provided for by the law of eminent domain. If a public utility seeks relief under this Section in the same proceeding in which it seeks a certificate of public convenience and necessity under Section 8-406.1 of this Act, the Commission shall enter its order under this Section either as part of the Section 8-406.1 order or at the same time it enters the Section 8-406.1 order. If a public utility seeks relief under this Section after the Commission enters its order in the Section 8-406.1 proceeding, the Commission shall issue its order under this Section within 45 days after the utility files its petition under this Section.

This Section applies to the exercise of eminent domain powers by telephone companies or telecommunications carriers only when the facilities to be constructed are intended to be used in whole or in part for providing one or more intrastate telecommunications services classified as "noncompetitive" under Section 13-502 in a tariff filed by the condemnor. The exercise of eminent domain powers by telephone companies or telecommunications carriers in all other cases shall be governed solely by "An Act relating to the powers, duties and property of telephone companies", approved May 16, 1903, as now or hereafter amended.

1.5. In order to stagger product registrations, the Department shall, for the 2011 registration year, register half of the applicants and their products for one year and the other half for 2 years. Thereafter, a business registration and product registration shall be for 2 years.

2. Registration applicant shall file a statement with the Director which shall include:

- A. The name and address of the applicant and the name and address of the person whose name will appear on the label if different from the applicant's.

- B. In the case of renewal registration, the Director may accept a statement only with respect to information which is different from that furnished previously.
5. The Director may prescribe other requirements to support a pesticide registration by regulation.
6. If the renewal of a pesticide registration is not filed within 30 days of the date of expiration, a penalty late registration assessment of ~~\$400~~ \$300 per product shall apply in lieu of the normal annual product registration fee. The late registration assessment shall not apply if the applicant furnishes an affidavit certifying that no unregulated pesticide was distributed or sold during the period of registration. HOUSE RESOLUTIONS

The following resolutions were offered and placed in the Committee on Rules.

HOUSE RESOLUTION 1165

Offered by Representative Mendoza:

WHEREAS, The Illinois House of Representatives finds that influenza is a contagious respiratory illness caused by the influenza virus; and

WHEREAS, The best way to help prevent seasonal influenza is by getting an influenza vaccination each year; and

WHEREAS, Every year in the United States, an average of more than 200,000 people are hospitalized from influenza-related complications and approximately 36,000 people, most of whom are elderly, die from influenza-related causes; and

WHEREAS, While influenza viruses can cause illness in people of any age group, children are most likely to get sick because their immune systems aren't strong enough to fight off the infection; children and young adults ages 5 to 19 are 3 to 4 times more likely to be infected with influenza than adults; school-aged children are the population group most responsible for transmission of contagious respiratory viruses, including influenza; and

WHEREAS, The elderly make up the population that is most vulnerable to severe illness from influenza, due to weaker immune responses to vaccination; and

WHEREAS, The U.S. Centers for Disease Control and Prevention Advisory Committee on Immunization Practices recently began recommending universal routine seasonal influenza vaccination for all persons aged 6 months of age and older; and

WHEREAS, School-based vaccination programs have been documented to be an effective way to vaccinate children while reducing transmission and infection rates to the large community, while at the same time reducing rates of school absenteeism due to children being infected with influenza; and

WHEREAS, Increasing the focus on providing influenza vaccine to children targeted for immunization will also help efforts to build a sound foundation for future vaccination efforts; and

WHEREAS, Schools can be an effective infrastructure tool to improve pandemic planning by developing collaborations and enhancing partnerships between local health departments, schools, and other community health partners, so that those collaborations can be utilized to help facilitate mass immunization during a pandemic outbreak; and

WHEREAS, Although experience has demonstrated the feasibility and success of school-based influenza vaccination programs in vaccinating school-age children, the Illinois House of Representatives is aware that funding and logistical considerations, particularly involving the procurement and delivery of vaccine to children with private health insurance coverage, continue to present issues of program sustainability; therefore, be it

RESOLVED, BY THE HOUSE OF REPRESENTATIVES OF THE NINETY-SIXTH GENERAL ASSEMBLY OF THE STATE OF ILLINOIS, that we support school-based influenza mass vaccination collaborations among local health departments and elementary and secondary schools in their jurisdictions for the purpose of vaccinating school-age children against influenza in accordance with the recommendations of the U.S. Centers for Disease Control and Prevention Advisory Committee on Immunization Practices for the annual vaccination of all school-age children 5 through 18 years of age; and be it further

RESOLVED, That these programs through coordination with local health departments, school nurses, school health care programs, and other local entities shall be voluntary for all participants; the influenza vaccination shall be administered only with the consent of the student's parent or legal guardian; and be it

further

RESOLVED, That suitable copies of this resolution shall be presented to the Illinois Department of Public Health and the Illinois State Board of Education.

HOUSE RESOLUTION 1166

Offered by Representative May:

WHEREAS, Water is our most valuable natural resource; and

WHEREAS, Tap water provides vital public health and fire protection; tap water also provides support for our economy and sustains the quality of life we enjoy; and

WHEREAS, Americans consume approximately 50-plus gallons of water a day on average; and

WHEREAS, All measures of a successful society, including low mortality rates, economic growth and diversity, productivity, and public safety, are all in some way related to access to safe drinking water; and

WHEREAS, Every citizen is called upon to help protect our source waters from pollution and to promote water conservation; the United States Environmental Protection Agency suggests that if each resident fixed all their household water leaks and put in low-flow shower heads today, they could reduce their water consumption by 25%; and

WHEREAS, True cost pricing of water is an important element in present and future water conservation, in contrast to water rates that are artificially low due to various subsidies; and

WHEREAS, It is critical to the future health and growth of the State of Illinois that both private and public systems continue to invest in our water infrastructure; the U.S. EPA estimates that there is a \$330 billion dollar gap in water infrastructure investment throughout our nation; the State of Illinois should continue to promote investment in its water infrastructure both in public and private systems; and

WHEREAS, It is imperative that adequate funding be made available for the State of Illinois to ensure that essential research and analysis of Illinois' current and future water needs can be done by organizations such as the Illinois Water Survey and the State Regional Water Supply Committees; therefore, be it

RESOLVED, BY THE HOUSE OF REPRESENTATIVES OF THE NINETY-SIXTH GENERAL ASSEMBLY OF THE STATE OF ILLINOIS, that we join with the rest of the nation in celebrating National Drinking Water Week and applaud the workers who work hard every day to ensure that the citizens of the State of Illinois have safe, fresh, reliable, high-quality drinking water; and be it further

RESOLVED, That we commit ourselves over the next year to vigorously raising the consciousness of the public on the importance of safe water resources.
