Speaker Hannig: "The hour of 12:00 having arrived, the House will be in order. The Members will please be in their seats. Members and guests are asked to refrain from starting their laptops, turn off their cell phones and pagers and rise for the invocation and the Pledge of Allegiance. We'll be led in prayer today by Pastor Kirk Alan Smith with the House... with House of Prayer in Albion, Illinois. Pastor Smith is the guest of Representative Reis."

Pastor Smith: "Let's pray together. We come to You today in Jesus' name. Thank You for the opportunity and the privilege of blessing this day for these men and women as they conduct business for the great State of Illinois. And this day of partisan politics and personal agendas, may this group of people not be content with mediocrity of imitating what other State Legislatures are doing, but instead may they be on the cutting edge of creativity, courage, inspiration, and maturity. This state has fiscal challenges, educational challenges, employment challenges, and moral challenges, that when we seek Your face and work together there's no challenge too big. This group of people yield great power, accomplishing more with one signature of their name than some folks accomplish in a lifetime. May they balance that power with a sense of responsibility, accountability, and humility. We also ask that You bless any spouses and/or children home today who sacrifice much so that these men and women can serve this state with clarity of vision and purpose. For each of them

Speaker Hannig: "And we'll be led in the Pledge today by,  
Representative Froehlich."

Froehlich - et al: "I pledge allegiance to the flag of the  
United States of America and to the republic for which it  
stands, one nation under God, indivisible, with liberty and  
justice for all."

Speaker Hannig: "Roll Call for Attendance. Representative

Dugan."

Speaker Hannig: "Representative Bost."

Bost: "Thank you, Mr. Speaker. The Republicans are all here,  
present and ready to do the work of the people."

Speaker Hannig: "Thank you, Mr. Bost. Mr. Clerk, take the  
record. There are 114 Members answering the Roll Call, a  
quorum is present. Mr. Clerk, would you read the Committee  
Reports?"

Clerk Mahoney: "Committee Reports. Representative Hoffman,

Speaker Hannig: "Representative Phelps, for what reason do you rise?"

Phelps: "Point of personal privilege."

Speaker Hannig: "Yes, state your point."

Phelps: "Thank you, Mr. Speaker and Ladies and Gentleman of the House. As you may or may not be aware, April 2005 was commemorated as Car Care Month by House Resolution 107. In keeping with that spirit of that Resolution, let me advise you that a battery care, even a maintenance-free battery needs a little extra TLC. In fact, some preset engine-controlled conditions such as idle may need to be reset if battery power is interrupted. You may also need to reset the clock and radio. Be certain to consult your vehicle owner's guide for the correct procedure. Thank you, Mr. Speaker, for allowing me to pass on these helpful tips to you and my colleagues. Thank you."

Speaker Hannig: "We'll have him go check the oil, okay? Representative Bailey. Representative Bailey. Representative Bailey, on page 26 of the Calendar, you have House Bill 1289. Would you like us to call that Bill? No. Okay. Out of the record. Representative Bellock has House Bill 3451 on page 28 of the Calendar. Mr. Clerk, would you read that Bill."

Clerk Mahoney: "House Bill 3451, a Bill for an Act concerning education. Third Reading of this House Bill."

Speaker Hannig: "Representative Bellock."

Bellock: "Thank you very much, Mr. Speaker. House Bill 3451, is a Bill that allows new hirings in school to check on the State Police website about if people, sexual offenders, are on the data registry list. This is a Bill that we had an Amendment onto yesterday. I explained it that we re... removed all the orders of protection and that it is a very simple process now for the schools to go on the State Police website to see this sex offender data base. I know of no opposition. The State Police are fine with it and so is the IEA."

Speaker Hannig: "This is on the Order of Short Debate. Does anyone stand in response? Then the question is, 'Shall this Bill pass?' All in favor vote 'aye'; opposed 'nay'. The voting is open. Representative John Bradley has House Bill 1080 on page 8 of the Calendar. Okay. Out of the record at the request of the Sponsor. Representative Bradley, how about House Bill 2411? Mr. Clerk, would read the Bill. 2411."

Clerk Mahoney: "House Bill 2049, a Bill for an Act concerning economic development. Second Reading of this House Bill. No Committee Amendments. No Floor Amendments have been approved for consideration. No Motions filed."

Speaker Hannig: "The Gentleman moves for the adoption of the Floor Amendment. All in favor say 'aye'; opposed 'nay'. The 'ayes' have it. And the Amendment is adopted. Any further Amendments?"

Clerk Mahoney: "No further Amendments. All Motions have been filed."

Speaker Hannig: "Third Reading. Representative Rich Bradley, on page 25 of the Calendar, you have House Bill 805. Okay, that's out of the record at the request of the Sponsor. Representative Black, on page 24 of the Calendar, you have House Bill 48. Mr. Clerk, would you read that Bill, please."

Clerk Mahoney: "House Bill 48, a Bill for an Act concerning liquor. Third Reading of this House Bill."

Speaker Hannig: "The Gentleman from Vermilion, Representative Black."

Black: "Thank you very much, Mr. Speaker and Members of the House. House Bill 48 keeps a commitment that I made and I appreciate the indulgence of the... the Members of the House and the Senate. Vermilion County was trying very hard to attract the Farm Progress Show as its permanent Illinois site. House Bill 48 provided a township that could issue a temporary liquor license, even though the township had been voted dry. That was a controversial Bill, I appreciate the support that I had, but the Farm Progress Show went to Macon County. I'm pleased for Macon County but I am

keeping my commitment. I said if we didn't get the Farm Progress Show, we would repeal... or I would attempt to repeal that law that allows a township to issue a temporary liquor license, even though the township may have voted itself dry. That's what House Bill 48 does. I'll be glad to answer any questions."

Speaker Hannig: "This is on the Order of Short Debate. Does anyone stand in response? Then the question is, 'Shall this Bill pass?' All in favor vote 'aye'; opposed 'nay'. The voting is open. And this Bill, having received a Constitutional Majority, is hereby declared passed. Representative Black, you also have House Bill 325 on page 24 of the Calendar. Mr. Clerk, would you read that Bill."

Clerk Mahoney: "House Bill 325, a Bill for an Act concerning real property. Third Reading of this House Bill."

Speaker Hannig: "The Gentleman from Vermilion, Representative Black."

Black: "Thank you very much, Mr. Speaker and Ladies and Gentlemen of the House. This Bill... and I wish I didn't have to call this Bill, but unfortunately the University of Illinois and my constituent have not yet reached an agreement. To make a long story short, I have a family in my district that purchased land, received a recorded deed, and clear title to 30 acres of land that they purchased in

HOUSE OF REPRESENTATIVES  
TRANSCRIPTION DEBATE

35th Legislative Day

1972. They have paid taxes on that land, they built a house on that land. And about 8 or 9 years ago the University of Illinois was checking over some surveying records and found that they, in fact, owned most of the land in question. Now, we have been trying to work out an arrangement, but we've not been successful. So what House Bill 325 does is simply to transfer 30 acres of this land from the University of Illinois to the Vanderport family, who has also owned and paid taxes on this land since 1972. They are willing to pay fair market value. The appraisal has been made and is on file. And this means that my constituent is literally paying for this land twice. But I... I think it's a... a situation that we need to pass to bring the university to the table and hopefully, we'll get this worked out without the necessity for this legislation. But as time grows short, I need to move it to the Senate. Be glad to answer any questions that you have."

Speaker Hannig: "This is on the Order of Short Debate. And in response, Representative Franks is recognized."

Franks: "Thank you, Mr. Speaker. Will the Sponsor yield?"

Speaker Hannig: "He indicates he'll yield."

Franks: "Mr. Black, I just was handed a... an appraisal of the property and it indicates that the 14 acres that are in dispute here is worth approximately \$15,500. Is that correct?"

Black: "That... that's my understanding."

Franks: "Okay. I guess my question... and... and you've been here a lot longer than me, maybe you can help me. Why do we

HOUSE OF REPRESENTATIVES

35th Legislative Day

need legislation at this time when the two parties are in active negotiations and if those active negotiations should fail, there's also redress through the courts?"

Black: "As you know from your legal background, the university is not held applicable to adverse possession laws."

Franks: "Correct."

Black: "You or I would've lost all claim to this land since the Vanderport family purchased it in... in 1972 and have been paying taxes on it ever since. We have tried to negotiate this for the last 3 years. I will say that we are beginning to see some progress, Representative. But as time runs out next Friday, I... I need to move this Bill to the Senate. I think it puts added pressure on the university to reach an equitable settlement with the Vanderport family, who by the way, are willing to buy the land again at fair market value just so they don't have to leave land that they already have built a house on. It's just one of those unfortunate situations. The university feels it's a very valuable piece of research land. I'm a... I'm a graduate of the University of Illinois, I love that institution. But in all due respect to the university, they have been less than cooperative in this measure for a number of years. I think if the legislation moves to the Senate, it may speed up the negotiation. And I'm with you, I... I hope this comes to a settlement so that this Bill does not have to end up on the Governor's desk. It shouldn't take that. But unfortunately, the university is a... is a large bureaucracy and things move rather slowly."

Franks: "I understand that the university is not subject to the adverse possession rules, but I'm thinking here that possibly the... I'm sorry, the Vandersta... the Vanderports are possibly barking up the wrong tree. Because if they purchased this property from a third-party seller, and I... what were they Millers? The Millers."

Black: "Right."

Franks: "Pur... typically, when you purchase land you buy a title insurance. Have they not gone and made a claim against the title insurance to make them whole? Because typically, if you or I had a problem and had a question of who owned the land, the proper way to go would be a claim against the title insurance. Has that been done here?"

Black: "I think you... you have just addressed the very root of this problem. Had they obtained title insurance they could've been made whole. They did not. They got an abstract company to research the deed, got clear title of the land back in 1972, and now are at some risk of... of losing their entire investment."

Franks: "Okay."

Black: "I agree with you, title insurance could have prevented this entire situation. But in '72, a lot of attorneys that specialized in real estate didn't consider that as important as they do now perhaps, particularly for rural... this is not farm ground, by the way."

Franks: "Right."

Black: "This is relatively rough ground, not suitable for farming."

Franks: "Well, it sounds like they got ripped off, these folks. And I understand that, but here's... and my heart goes out to 'em. I hate to see anybody get swindled, which is obviously what's happened to these folks. But I think we're setting a very dangerous precedent if we have to go to the General Assembly to get involved in problems between private parties first and now two... two different entities that are both claiming title. So for that reason, I've got a problem philosophically, because if we do it for this one, we have to do it for the next one and the next one and the next one. So I understand what you do. I respect that you're fighting for your constituent. But for those reasons, I can't stand with you. But thank you."

Black: "Oh, I... I understand that. And... and just briefly in response. If any entity other than the flagship university was involved, I think this would and could have been resolved. And I still am hopeful that it will be resolved. The former chancellor, I don't think took this very seriously. The interim chancellor has talked to the Vanderports, I have been able to talk to Chancellor Herman. I'm hoping that they work this out. But the Vanderport's attorney sug..."

Speaker Hannig: "Representative Franks, your... your time has expired. So, Repre... Representative Black, you're recognized to close."

Black: "Thank you very much, Mr. Speaker and Ladies and Gentlemen of the House. All of us are often in this position, and I think Representative Franks brought up a

very valid point. We've tried everything over the years to resolve this in a satisfactory manner. And we all are here at some point or another to represent our constituents. I think the University of Illinois, as much as I respect that flagship university, has been less than cooperative in trying to work out an equitable settlement for the Vanderport family. In fact, one of their representatives years ago knocked on the door of their home, told the Vanderport's 70-year-old mother that she had 'x' number of days to vacate her house. That there had been a mistake and in fact their house was on university land. This could've been handled in a more humane and a more sensible fashion. My constituents paid for this land in good faith. They are willing, again, to pay market value to the university for this land. They're not asking for a handout. They're not asking for anything that I think any of us would want in the same set of circumstances. They've done everything that their attorney recognized them to... or advised them to do and it hasn't worked up to this point. I want you to keep in mind that the University of Illinois is an extension of the General Assembly. We set many of their operating parameters, not expressly given to them by... by us. It's... it's not that I'm trying to interfere in a great university, I just think this has been mishandled. I feel that my constituents have to have some remedy and it appears that the General Assembly is the only remedy that they can look to at this point. I humbly ask for an 'aye' vote."

prior to the election the centralized statewide voters registration list on the computer at the Springfield office and the State Board of Elections. The person viewing the list must provide his/her name, address, and telephone number so that such information, along with the time the person accessed the database, may be available to the public. The person viewing the list may not leave the office of the State Board of Elections with a copy of the list. Basically, this legislation stems from a concern raised by the Illinois Press Association that they should have access to the centralized statewide voters registration list. Under current law, members of the press may view registration cards but, pursuant to Bills been passed in '93, they might not view electronic voter registration records. And what this Bill does is allow them to view the voters electronic registration records even though they might not have a copy of it after they view the Bill. And I would ask for a favorable vote and I would answer any questions. Thank you."

Giles: "Okay. So, I mean, as... as an association, they... they may not. But can an individual... just like if I were to go to the Board of Election and ask to view someone's voters registration to make sure that they are registered to vote at a particular address, I can do it, and you're saying that the association can't do it."

Jefferson: "The person cannot. But normally you have to be affiliated with an organization, i.e., the Democratic Party, Republican Party, an organization such as that nature."

Giles: "And in this legislation you have that... I mean, but you know, any person can view the list. They can view the registration list, is that correct?"

Jefferson: "As long as we've got their name, address, and telephone number, yes."

Giles: "Okay. So, if any person can view... I'm sure when that individual that may represent the Illinois Press Association, if that individual want to see someone's registration they have access to do that. Is that correct?"

on the question of definition. We're not saying they have to come to an adjudication, we're saying they have to respond. Because what's been happening, quite frankly, is you'll get an ordinance violation. And one will get an ordinance violation and the individual will have a specified time to reply, such as 10 days. And as a res..."

Parke: "Well, I..."

Franks: "And as a result, people will have to jump through a lot of hoops, get engineers, do everything they can, and then the county will sit on their respo... pay lawyers, which I know you don't like that, and then the county will sit on it for 3 or 4 months. And that's just not fair. If they've given you... if they're giving the citizens a certain amount of time, then the county or municipality should be held at the same standard."

Parke: "Well, I'm not opposed to anybody making a living, Representative."

Franks: "Thank you."

Parke: "But rather than have a turf battle here, did you try to find common ground with the opponents?"

Franks: "We did. We did and that's why we exempted the City of Chicago. But going through... what they really wanted to do... the bottom line, Metro Counties said, 'Well then, just do it for McHenry County and we'll be okay with it.' But we didn't think that was fair to have special legislation. We thought if it's good for us, it should be good for the other ones as well."

Parke: "Well, I don't think that's... that's a compromise. You're simply... the big dog said you can't pass it unless you exempt us. The rest of 'em... the rest of 'em, represented by a lot of us, can just go scratch. And I don't know if that's the way I wanna see things done down here. I was hoping that you might be able to find common ground with them."

Franks: "We tried but they... what they wanted as common ground was not to have this Bill."

Parke: "Okay."

Franks: "And we see a real need for it and everyday we hear of constituents calling us and complaining about it. So, I know they don't wanna do it, but sometimes, ya know, they're wrong."

Parke: "Thank you, Representative."

Speaker Lyons, J.: "The Chair recognizes the Gentleman from Vermilion, Representative Black."

Black: "Thank you very much, Mr. Speaker. Will the Sponsor yield?"

Speaker Lyons, J.: "Indicates he will."

Black: "Representative, are you submitting this on behalf of a constituent?"

Franks: "Yes, I am."

Black: "You're bringing a constituent matter to the General Assembly? Are there no courts?"

Franks: "Unfortunately, there aren't here. We treat our people in the court system a heck of a lot better."

Black: "Is there no title insurance?"

Franks: "That's right. I wish there was."

Black: "Seriously, I just couldn't resist that."

Franks: "No, I don't blame ya."

Black: "The timing was too good. The... the only question that I have, and I think it... you and I are in agreement on a lot of things about the frustration that government can put people through, also the university."

Franks: "That's right. You got 113 votes on that. I was impressed."

Black: "Just one of the things that counties are concerned about, Representative, is what... what is... what is the nature of the response. It isn't defined. They're not sure what they're supposed to do."

Franks: "We just wanna get back... 'cause what happens is... and this is what happens in the real world. Someone... you get an ordinance violation, a red tag, and they say your septic system is wrong and you've gotta get it fixed within ten days. So then we hire the engineers, we do everything we think we need to do. We go and spend thousands of dollars and then the county sits on it for three months and you have no idea whether you've complied or not. If it's important enough for them to tell you you have ten days to fix it, well then they should let us know within ten days whether it's right. That's all, it's just common courtesy. And if they can't get it done within ten days, well then at least give the citizen twenty days or however... however much time that the county believes that they need to check it out. Well then be fair to our citizens and give them that

same amount of time. That's all we're saying. Don't be heavy-handed. And we found our counties to be extremely heavy-handed to our citizens and I'm just trying to level the playing field."

Black: "There... there must be something that I'm not seeing, otherwise the opposition would not be as... as lengthy as it is, Metro Counties, IML, the Municipal League."

Franks: "It might be the same lobbyist."

Black: "For... and I'm not sure... I'm trying to focus on where their opposition is. Is it the lack of specificity on what the response is to be, the lack of a specific time? I... I..."

Franks: "Well, the time issue, they brought that up to me and I says, 'Well, the time issue you guys set. Whatever you think you need, well then, you give it to the citizens as well.' So that's really not an issue. And they said, 'Well, that's not fair.' I'm like, well how can it not be fair? You're the ones who're setting it. And I don't understand their ar... their argument about the definition, we're just saying respond back."

Black: "All right. In... in the event that there is a... a malfunction... or a malfunctioning septic system and it is entering the ground water that a municipality may use as its drinking water and the municipality says, look, this cannot... cannot continue. Now, you either fix it in five days or we'll block the septic system. So, under your Bill, then what would the homeowner's remedy be or response be?"

Franks: "Well, what we'd say is, okay, we're gonna get this done within five days. Then what we expect then is the city to come out and inspect it within the next five days. Because why would they ask you to go to all that additional expense, ya know, if you've gotta hire someone on an emergency basis, and then they don't show up for three weeks?"

Black: "Okay. All right."

Franks: "That's my point."

Black: "So, in other words, what you're saying, you make a reasonable... a good faith effort to comply with the violation and then they may not come back for weeks..."

Franks: "Right."

Black: "...to give you any indication that you've done a good job or thank you very much or whatever."

Franks: "Right. You..."

Black: "Okay. Fine."

Franks: "You articulated it much better than me, Representative."

Black: "Thank you very much, Representative."

Speaker Lyons, J.: "The Chair recognizes the Gentleman from McHenry, Representative Tryon."

Tryon: "Thank you, Mr. Speaker. Will the Sponsor yield?"

Speaker Lyons, J.: "He indicates he will."

Tryon: "Thank you. I realize that we have objections from the Illinois Municipal League and Metro Counties but I think their objection is unfounded from this reason, they are objecting because there is no specific time frame in which

STATE OF ILLINOIS  
94th GENERAL ASSEMBLY  
HOUSE OF REPRESENTATIVES  
TRANSCRIPTION DEBATE

35th Legislative Day

they can respond... are required to respond in. The time frame is up to the individual municipality. We have left the language in the Bill that simply says, if you require a specific amount of time for somebody to respond to an ordinance violation, you must respond to them in the same amount of time. If you give ten days and that's not long enough, give twenty days. If twenty days isn't long enough, give thirty days. So, I believe that the language is very flexible to accommodate the needs of every single unit of government that has any kind of ordinance enforcement responsibility. I believe this is the time for the General Assembly to say that there are reasonable service expectations within the laws that we allow units of government to enforce. I think you can ask any county board chairman, any mayor, they get calls on a daily basis asking to expedite these types of applications and I think this just sets and establishes a time frame in which to do so. Allows total flexibility on the unit of government to pick that time period to work with their constituents. I think this is good policy and good government and I would urge your support."

Speaker Lyons, J.: "Representative Franks to close."

Franks: "My colleague from McHenry said it better than I could, as did the prior speaker. I'd ask for an 'aye' vote. This is good government. It's... it's requiring government to give the service in a reasonable manner in which all citizens should expect. I, please, would ask for an 'aye' vote."

House Bill 405 deals with a notification that is placed in a local paper regarding a tax levy that is in excess of 105 percent of the previous year's extension. Currently, that language does not reflect accurately that the amount to be levied, both in percentage and dollar amount, is an estimate. And all this does is simply add the word 'estimate' to the existing publication notice that is required by the law to go in the paper. And I'd... And since that time, we've enjoyed numerous economies, we've saved over a billion dollars in fraud and other efficiencies. It's one of the best systems... recognized as the best system in the United States. The purpose of this Bill is to encourage the expansion of this so that we can accomplish more cost savings, more efficiencies, and quicker access to our information. Parke: "Thank you, Mr. Speaker. Will the Sponsor yield?"

Hoffman: "I don't know why, all we do is allow for more money to go to children's research hospitals. But I understand that they are just against any type of changes in the gaming laws. So, they're... they are opposed."

Parke: "So, in essence, this Bill sets up an additional way of gambling?"

Hoffman: "No."

Parke: "Does... will it offer..."

Hoffman: "All this does is..."

Parke: "Doesn't it set up a raffle?"

Hoffman: "No. The Raffle Act already exists. All this does is it indicates that the amount that you can give away and raise for children's research hospitals, basically there... the amount that you can give away is not limited. So, what's happened is St. Jude's Hospital, the children's

research hospital, it's my understanding what they do for their fundraising for children's research... for children's research health problems, they give away... they give away large prizes like a house. Apparently, in certain areas of the state you can't give that big of a prize away. This says if the sole purpose is for the research hospital and it'll be proceeds of the raffle will be used for scientific or educational purposes for that children's hospital, then that... that limit wouldn't apply."

Speaker Lyons, J.: "The Gentleman from Peoria, Representative Leitch."

Leitch: "Thank you very much, Mr. Speaker and Ladies and Gentlemen of the House. The purpose of House Bill 3272 is to prevent the administration from sweeping the Teacher Health Insurance Security Fund into General Revenue's, as they did last year. Like probably everyone in this chamber, when we went back and talked to our teachers when we were not in Session, we learned that they were extremely unhappy that their rates had been increased by a total of \$4½ million and then that \$4½ million was swept away into General Revenue. This Bill would prevent that from occurring again and I would ask for your approval."

Graham: "Sure."

Brady: "But I appreciate our discussions and ability to work together to try and find the resolution. I simply just come back to the fact of I believe the access... the information's already there. I believe the child death review teams can have access to any death certificate, investigate any child's death that there is in the State of Illinois. I believe that it'll be a burden on DCFS regarding this and vital records. And specifically for that, I just once again want to say that I understand what you're trying to do. I just think that there's enough avenues out there to get this information to any concerned party for research data. And with that, I just wanna let you know why I'm gonna be voting 'no' on the Bill."

why... ya know, I mean, the coroner's reports are just that. They're reports. And if people need to find those, they can find those. Why are we saying, okay, if... if an accident occurs where a child is backed over, if I'm understanding this correctly, backed over or involved with the elec... use of electric windows, is that correct?"

Graham: "Power windows, yes. There have been a number of reported deaths of children..."

Bost: "Hold on. Mr. Speaker, I... I can't hear."

Graham: "There have been a num..."

Speaker Lyons, J.: "Ladies and Gentlemen, if we could get a little silence in the chamber we'd appreciate it. To bring back what Chuck Hartke used to use to effectively, shhh... Thank you."

Graham: "There was an incident in Grundy County where man backed over his daughter with his pickup truck. And when we went to go do some research on how many incidents had happened like this, there was no clear cut way of getting it. The state currently keeps track of motor vehicle accidents but they don't tell you how the person died. If I just wanted to pick up some statistics that told me that, it would say motor vehicle. It wouldn't say that the child was backed over or that they were killed in an automobile accident. So this piece of legislation is geared towards having that infor... collecting that information and having it available when we want to access it and know... we can keep track of how many accidents happen like this. There was also an accident that happened in... in Oak Park as well,

a grandmother backed over her grandchild. And a incident where a child was decapitated in downstate Illinois being ran... being involved in a power window incident."

Bost: "Okay. And... and what you're saying is... is if you search back in those records, the... the police report, the coroner's report..."

Graham: "When we go to..."

Bost: "...the hospital report doesn't show anything about how the accidents occurred?"

Graham: "The point is... those reports do, but if you go to the source of where the national kind of database thing is kept, there are no statistics set aside to let you know how many that were backed over. This piece of legislation will allow just for an extra line in the annual report of the Child Death Review Team to give you those numbers plain and clear. Right now, they don't. They just tell you motor vehicle accident."

Bost: "Well... and I understand what you're saying, but couldn't we take this to extremes? I mean, any time there's any accident at all, it is reported it at the police and... and details are given. Or if you go to the hospital the details or how the accident occurred are written into the medical records."

Graham: "Representative..."

Bost: "So, now we're saying that all of that then has to be transferred to some place else? We... aren't we doing the work for somebody else?"

Graham: "It's a small number of children. At least, I think, 15... 8 to 15 children. So it's not a dramatic change in... in the process. It's not... when I met with the coroners, 'cause I did meet with them last year, they did agree that they would send those medi... those accident... the death certificates directly to the Department of Children and Family Services so that they could keep these statistics. Right now, that they... right now, there is a line on it but we wanted to make sure out of all clarity. Some people are not aware of the system or how to navigate the system as well as you and I might be able to go to different sources. But again, there was no statistics kept anywhere that we could just access and pick up the number. We have to do research to find out that number of... number of children that have been killed in back over or power windows, when we simply now, if this legislation is passed, we'll simply just go to one... ya know, one source and get that information."

Bost: "And like I... then like I said, would... do we then need to come back next year and say someone... do we... for instance, do you have the statistics of when a garage door might come down on a child?"

Graham: "Well, that... that has changed now since the garage door opener now... when it detects something beneath the door the garage automatically goes..."

Graham: "We're clarifying..."

Bost: "My only concern is we're asking someone else to go out and do all the research..."

Graham: "We're not asking anybody to go out and do anything. We're just asking that the regular process that takes place in a hospital emergency room, that they clearly mark or keep the statistics of children that were backed over or injured in a back over incident or power window incident and forward the death certificates on to the Department of Children of Family Services, who I met with by the way. And they'll add this line into the annual report that's already being produced by the Child Death Review Team and we'll know how many children have suffered at the hands of this kind of accident."

Colvin: "And... and I'm just assuming here that... and my assumption is... is that you would want to know why those children died in that fashion..."

Graham: "Yes."

Colvin: "...so that if something needed to be done, we would know that by virtue of the statistics that would bear out..."

I think it's the same situation with teen suicide, which I think once it became apparent in that we codified the death as a result of suicide that they were able to get a grips on it. And it led to the treatment of depression and other things that would lead to an individual... a child who would want to take his own life. is you don't really realize that there's a problem that needs to be fixed or cured, something that either auto manufacturers could do or something that parents or individuals who operate motor vehicles would have to do until you have credible research. But over a period of years, we've had reports of and hearings about abuse on staff by patients and it's become a serious problem, making it difficult to hire and keep good staff at various of our health care facilities around the state. After working very hard with the Illinois Nurses Association and Community Behavioral Healthcare Association and others,

we've created this Health Care Workplace Violence Act. It would require by July 1, '06 every health care workplace to implement a plan reasonably expected to prevent and protect employees from violence. These plans would be reviewed every 3 years. It also requires that by July 1, '07 all health care workplaces must provide violence prevention training to all of its affected employees. And it also requires that by July 1, '06 every health care setting must keep a record of every violent act against any employee, any patient, or any visitor at any health care setting. There are some exemption to this and some other things. It's a very important piece of legislation if we're gonna get our best and brightest to work at these facilities and I would urge you to vote for this."

Lang: "They helped write some of the substantive language in the Bill and I'm grateful for that and they're opposed on fiscal grounds. The fiscal notes that they filed, if you add them all up, amount to one-point-something million dollars. I think those numbers are overblown, frankly,

because they're trying... they don't want to spend any money. And so, I think we know that a lot of the fiscal notes prepared by the departments have been overblown this year. But even if that were the number, this is a very important piece of legislation to protect these health care workers."

Parke: "Well, we have lots of important legislation and I'm not belittling this one at being important. However, do you have another funding source of a million dollars for this?"

Lang: "I don't have any specific funding source for this..."

Parke: "Well..."

Lang: "...but we have budget negotiations ongoing. It's up to us to decide where and how we spend our money."

Parke: "Well, that's a fact and that's one of the concerns that I have, is that we continue to press on with legislation with no funding source. We raise the expectations of the people that we sponsor this legislation for and ultimately we don't have any money to pay for it and it sits in some nebulous space somewhere and doesn't pass because we don't have the money or the Governor has gotta pull it out of his budget message... out of his budget. So, I just wanna point out to the Body that, again, worthwhile Bill but we don't have the ability to pay for it. And it continues to have one Bill after another Bill, after another Bill, all subject to appropriation. Where does it end and how much money can we continue to spend in this Body without having a funding source, no matter how worthwhile? Bill after Bill after Bill, I don't know where it'll end. It won't end. We just keep doing it and we keep running further and

It has nothing to do with the chips. I am told, because I talked to both the park districts and DNR, that there are federal rules that would apply to any woodchips, that they must be uniform and not have sharp edges. Therefore, no one would use woodchips made onsite for any of the chips for children's playgrounds. But I really appreciate your concern."

They wouldn't grind them up onsite."

Parke: "Wait a minute. So, you're putting in legislation to solve something that's not a problem?"

May: "It's not about woodchips, Representative. It's about the playground sets that were built with... with this arsenic-treated wood."

Parke: "All right. How many reports have been reported to..."

May: "I'm not aware of any reports."

Parke: "You're not report... so you have a Bill that nobody has complained, nobody is getting sick on. Would you then tell them that they have to replace these or you can't put any new ones in?"

May: "No, this is... this is going forward. This is going forward."

Parke: "So, going forward."

May: "Yes."

Parke: "But there's nobody complaining about it, but you think that this is something that we really have to do in this state and have a piece of legislation for something..."

May: "Representative, yes."

Parke: "...that nobody's getting sick on."

May: "Representative, the health of the child of the State of the Illinois is very important to me and I honestly think it's important to you also. So..."

Speaker Lyons, J.: "She indicates she will."

May: "Yes, it's hard to hear your question. The Floor... it was not adopted, no."

Meyer: "All right. And in committee, did anyone testify against this Bill?"

May: "No. I said it came unanimously out of committee and no one testified it against it."

Speaker Lyons, J.: "The Gentleman from Cook, Representative Molaro."

Molaro: "Thank you, Mr. Speaker. This Bill gives what other... a few other systems have, and it's a very simple Bill. In the retirement system right now, if... in the teachers' retirement system of Chicago, when they make an overpayment or somebody leaves and then comes back and wants to pay it and wants to do it through their retirement they're not allowed to say, okay, you'll get 2 thousand a month and we'll take a hundred a month out and that pays for your refund or you were overpaid \$8 hundred. Out of your 18 hundred a month, we're gonna take a hundred dollars a month out of it. Right now, under their particular pension system, they're not allowed to do this. And this allows them to do this when it comes to overpayment or errors and that's all the Bill does."

Speaker Lyons, J.: "Thank you, Representative. Are there any questions? The Chair recognizes the Gentleman from Cook, Representative Parke."

Parke: "Thank you, Mr. Speaker. Will the Sponsor yield?"

Chicago... the CIU is opposed to this legislation. Are they still opposed?"

Molaro: "Well, our... no one appeared in committee opposed to it and it's not in our analysis."

Parke: "Well, it shows here that it is in our analysis. That the... the IFT and the CIU are opposed. And... but, let me... is it as simple as our... our comment says, that it provides that the Chicago Teachers Pension Fund may withhold annuitant payments as compensation for debts owed to the system. Is it that simple?"

Molaro: "Say... I... could you say one more time?"

Parke: "It says... our analysis says, 'provides that the Chicago Teachers Pension Fund may withhold annuitant payments as compensation for debts owed to the system.' That's what they say your Bill does. Is there something wrong with that analysis?"

Molaro: "Well, I... I guess short answer would be 'yes', but it's... it's not that simple. The only way they could withhold is if that the required employee contributions are not made in whole or money was paid to the member annuitant through misrepresentation, fraud, or error. What this is trying to get to, Representative Parke, is that they'll come there and they'll issue a check for 18 hundred when it should've been 14 hundred."

Parke: "Well, I... I'm just curious. Ya know, you have this legislation, it's only for the Chicago Teachers Pension Fund. Why isn't it for all the other pension systems? Why... if this is such a great idea, why don't we do this to

other annuitants through the other... the other five pension systems? Why don't we do it through them?"

Molaro: "Well..."

Parke: "Why Chicago only?"

Molaro: "Well, it's probably... and not all... it's Chicago teachers' system, it's not even for the other Chicago systems. Some already have it and the other reason is that, just like has been said on this floor probably 5 hundred times this Session, it is probably a good idea but no other system has brought it forward. And as I said before, other systems already have this... some. I don't know which ones and I don't know which ones don't."

Parke: "Well, ya know, I'm uncomfortable voting for this Bill until I get a better understanding. Ya know, we... we have guaranteed under the Constitution of the State of Illinois that no pension benefits cannot be paid to an annuitant under... I think it's Article XIII. But under your Bill, you're circumventing that. You're saying to a Chicago teacher or the IFT that in Chicago that you'll get your... you can get that pension but we're gonna take part of that pension back to make payments directly owed to the system. I... I don't know if that sounds right to me. It just sounds to me like you oughta... you oughta take 'em to court rather than take the money that they need to live on. Ya know, a lot of these teachers retired a long time ago and they get very little pension money. And if they owed some money for something and you take that money away from them, they... they don't get their hands on it. That might could make a

difference on whether or not they could stay in their home or their apartment or whatever. So, either pull the Bill for the record or I'm gonna rise strongly in oppose... opposition to this until I can talk to the... the IFT to find out how strongly they oppose this. And... and I would ask the Body to vote 'no' unless we can get some understanding. And maybe it's very clear cut that we do have some answer on this, but right now I'm very uncomfortable and I think the Body should be uncomfortable..."

Molaro: "Well..."

Parke: "...until we get some sense of whether or not this really is a good idea. And I... ya know, I have not be briefed on it but it says right here..."

Molaro: "All right. Well, what... what we'll do... what we'll do is... the reason I'll pull it out of the record is for one reason and one reason only, everything you said I agree to. It has nothing to do with what's in this Bill. So obviously, either the analysis is wrong or the Bill that's on your screen is not the same Bill on my screen. So, I'll take it out of the record but I would... then when we come back, if you're gonna paraphrase the Bill you gotta paraphrase it correctly. So... because it doesn't talk about diminishing anybody's benefits. I know the Constitution as well as anybody. All it talks about, it says here that if you were given money through misrepresentation and fraud and error... again, if you were paid \$18 hundred and you know you were only supposed to get 16 hundred and you know that and you take the check and cash it, next week when you're

supposed to get your 16 instead of 18, they're only gonna give you 14 hundred. But, we're not gonna talk about this for 20 minutes. We'll take it out of the record and we'll talk privately. We'll do that. We'll do that."

Parke: "If... if, in fact, that Bill does what you just said..."

Molaro: "Done. Okay."

Parke: "...I will have no problem supporting it."

It provides that a person who is not party to a transaction that involves the use of a financial transaction device may not secretly photograph, capture, or distribute, disseminate, or transmit electronically any personal identifying information from the transaction without the consent of the person whose information is being taken. And the genesis of this Bill is simply the fact that the Federal Trade Commission in 2004 found that over 9.9 million Americans learned that they had been victims of identity theft at a cost of nearly \$50 billion. That's an average of \$5 thousand per victim. As the use of the Internet and electronic bill paying and electronic purchasing has grown, so has the crime of identity theft. Personal information is being stolen and used for illegal purposes and this Bill is part of the quest to prevent identity theft and crack down on thieves. I would be happy to answer any questions."

Patterson: "I'm sorry, Representative, I didn't hear you."

Patterson: "Well, here's... here's the real issue, Representative. If the health department does not figure out how to make it work then what we're doing, we're putting at risk citizens of this state as well as those maintenance workers that pick up our... the garbage that we discard in the back of our homes or in front of our homes every day of the week."

Parke: "Well, ya mean, how... how often have you heard about a sanitary worker getting stuck with a needle?"

Patterson: "Quite often in the large urban center that I reside in. It happens all the time, especially when they do recycling. These things are put into regular garbage bags, they're attempted to recycle off the conveyers, they're being stuck with these syringes and medical sharps that are not appropriately discarded."

Parke: "Okay. Well, let's see how it works."

Patterson: "Thank you, Representative."

Speaker Lyons, J.: "Thank you, Representative Parke. The Chair recognizes the Gentleman from DuPage, Representative Jim Meyer."

Meyer: "Thank you, Mr. Speaker. Representative, would you yield for a question?"

Patterson: "Yes, Sir."

Speaker Lyons, J.: "He will."

Meyer: "My... my understanding... I just wanna make... get this clear because there's a lot of noise in the... in the room here. This Bill does... this Bill does absolutely not provide for exchange of needles, correct?"

Patterson: "No. At the present time, this Bill is targeting those needles or syringes or medical sharps that are used at home, not something that is administered by a hospital or a health care unit. At the present time, those needles or syringes that are in possession of someone in their home, there's no provision for the appropriate dis... dis..."

Meyer: "What... under the current procedures that are out there right now, when... say, for instance, you were diabetic or used other needles for administering medication in the home, what... what happens to those, Representative?"

Patterson: "It's... it's thrown into the garbage, the little garbage container in the house. In many communities it has been carried or transmitted from the home to the garbage can on the exter... exterior in the alley or in the front of the home. The garbage or refuse(sic-refuse) collector comes along, they will pick those up in the refuse(sic-refuse) truck, deliver them to a dumping station in some communities. And where they have a program where they're sorting the garbage collection into recyclables, those workers are being injured by the syringes, needles, and/or medical sharps."

Meyer: "And... well, what happens if you wanna... if you wanna dispose 'em by taking 'em back to the people that sell ya the medications or prescribe the medications?"

Patterson: "Well, in my opinion, Representative, you... again, at the present time, pharmacies do not have a program by which they notify the users of these needles or syringes or medical sharps and human beings are creatures of habit, if

there's nothing that is actually informing them, training them, or teaching them what is needed to be done for proper disposal, it will be just be done in the most easiest fashion it is, and that is to dump it in the canister in the home. Meyer: "Thank you, Representative. I'd like to speak to the Bill."

Patterson: "...and he or she is injured."

Meyer: "Representative, I think you've given some very truthful and honest answers. I happen to deal... I happen to live in a household that deals with this problem on... on a weekly basis. What ya do you do with a needle that is used to administer medication and when it's done nobody seems to want it. Yes, we buy the little red canisters from the... from the pharmacist and try and dispose of them, but those things are easily broken into. They... they can fracture, they can open under the pressure of garbage. I believe that your... your Bill is a very good one. If nothing else, we need to... to start talking about what do we do with all this medical waste that... as we have more and more applications available for home usage. How... how do we protect the people that service us in removal of our garbage and our trash? with it, the doctors who prescribe it don't want anything to do with it. Everyone kinda washes their hands and yet there are people out there that are being injured. Speaker Lyons, J.: "Thank you, Representative. The Chair recognizes the Gentleman from Bond County, Representative Stephens."

Stephens: "Well, thank you. I... I think the issue of the Bill in general is... is good. But, the... I am concerned, first of all, with the pharmacy aspect of this. I... I wanna correct something that I heard... I think I heard earlier. And that is that pharmacists don't dispense information when they dispense needles and syringes. And that's just not true, they do. They might not have to, according to any statute, rule, or regulation but... but they do. And the drug... the companies that make and package syringes make sure that in those boxes and bags there is information on the proper disposal and it encour... they encourage that. I happen to be one who, in the process of my duties some years ago, was stabbed in throwing trash out at a hospital that I worked at by a syringe and it terrified me. I thought I might get hepatitis back then, that's all we had to worry about back when that happened. But... so, I support the Gentleman's Bill, but I... I'm concerned about the... the issue of

burdening pharmacists furthermore. I just don't trust the Department of Public Health with the sort of rules and regulations that they'll promulgate. They'll have three copies of every form, you'll have to save 'em for 7 years, there'll have to be a file system and a video recording of the proceedings and all that nonsense. I'm telling ya, we've got enough to deal with, with the... with the Governor's mail order programs and this, that, and the other. Pharmacies have enough to deal with today, we don't need another government regulation on how to teach people to dispose of these syringes. So, with those concerns, I still support your bill. I appreciate you bringing it forward."

The Bill amends the Illinois Controlled Substance Act to provide that methamphetamine restitution shall also be made to cover regular overtime costs incurred by local enforcement agencies and private contractors paid by public agencies in securing the site in which methamphetamine was manufactured. Currently, there's a law in place that restitution is made, but this Bill prioritizes that local government will get their money first and then state agencies and then federal agencies. Clerk Mahoney: "House Bill 738, a Bill for an Act concerning public employee benefits. Third Reading of this House Bill."

Speaker Hannig: "Representative Rose."

Rose: "Thank you, Mr. Speaker, Ladies and Gentlemen. House Bill 738 would allow legislative aide who has previously worked under contract for the General Assembly to purchase up 6 years of credit in the State Employees Retirement System for the cost of employee contributions plus interest. The Committee Amendment #1 makes this revenue neutral to the state. I repeat, there will be no cost to the state, that employee will have to pick up their... their contribution, the state... what would've been the state's contribution, plus any interest. So, this is revenue neutral. It comes from a longtime employee for former Representative Virgil Wikoff and I would ask for its favorable adoption."

Franks: "Thank you, Mr. Speaker. Will the Sponsor yield?"

Speaker Hannig: "He indicates he'll yield."

Franks: "Representative, I'm not sure I get it. Why are we doing this?"

Rose: "Very simple, Representative. Many years ago, legislative aides were not allowed into SERS. Today, if you so desire you can make your legislative aide or aides part of SERS. Back in Representative Wikoff's time that wasn't the case. He had an aide who was a con... happens to be a constituent of mine now who's gone on to work at the University of Illinois and would like to purchase service time in. At the hearing in conversations with SERS, apparently, there are several people out there. We have opened a window in the past. And I might add, Representative Franks, that window in the past had the state picking up the employer contribution plus interest. That's not what this does. This window will open but the employee will have to pick up the full cost plus interest, so it will be... remain revenue neutral to taxpayers."

Franks: "At the... up front it would be revenue neutral, but is there a difference between the different pension systems that they... that they could be in now versus the payments that they would get if they purchase... What I'm trying to figure out is whether they'd be getting a higher payment for doing a different pension system."

Rose: "I don't believe so, because what she's trying to do is buy in credit time that'll go towards... well, hold on one

second. Could you rephrase the question really fast? Make sure I get ya the correct answer."

Franks: "I will try. What I'm trying to figure is if someone's trying to buy time and they're already in a system, whatever the system might be..."

Rose: "They're not, Representative. She was not allowed in any system back then."

Franks: "But the way this Bill is written, would it allow people who are in different systems to be able to buy in to this system and enhance their pensions, even though they'd have a fixed cost, but it could cost the state much more money? What I'm trying to figure out is the real cost to the state down the road. Does that make sense?"

Rose: "Um, yeah. Representative Franks, the payments that they're gonna have to pay in will pay the full cost of the credit, so the actuaries have said that there won't be any liability. I... I guess I don't have a better answer than that."

Franks: "I guess my question is, is there a potential here for an enhanced benefit that they wouldn't have but for the ability to purchase in now? And I'm not talking about the person who is not in a system now, but for those that are already in. By the way this Bill is drafted, would it allow other individuals who are currently in a system to be able to buy in if they've spent any time at all under these parameters and then be able to enhance their pensions?"

Rose: "Yes, but there's no cost to the system 'cause they're gonna have to pick that up in the pay in."

Franks: "Well, there could be a cost to the system though, depending on the benefits in the... in the individual pension system. Because the pension systems that we have have different payouts, they have different... correct? Ya know what I'm saying? For instance, the General Assembly, if you're in for a certain amount of time you have a certain percentage."

Rose: "I... I do understand what you're saying and the systems have looked at that and they have said that there's no cost. As long as Amendment #2 was attached, that... that the employee will have to pay that... will have to bear that additional cost plus interest."

Franks: "As long as there's no additional cost, I don't see a problem. That was my real concern."

Rose: "That's... I'm not an actuary but I can only tell you what the system's told us, and they told us there'd be no additional cost."

Franks: "Could... should we pass this out, could we have... when it goes to the Senate could they have them check that out before they move it ahead?"

Rose: "I'll be happy to do that."

Franks: "Okay. Thank you."

Speaker Hannig: "This is on the Order of Short Debate but, Representative Miller, do you have a brief comment you'd like to add or question?"

Miller: "Yeah, a question."

Speaker Hannig: "The Sponsor will yield."

TRANSCRIPTION DEBATE

35th Legislative Day

4/7/2005

Miller: "Will the Sponsor yield? I missed the beginning of your comments in regards to this. Why are you doing this?"

Rose: "The... the situation was several years ago, prior to the mid 80s, legislative aides were not allowed to participate in SERS retirement plan. A constituent of mine who way back then used to work for then Representative Virgil Wikoff was a co... was a constituent considered a contract employee, there were retirement benefits. She's asked to have a buy in time to re... now that legislative aides are eligible for SERS, she's asked for a buy in. We've made this revenue neutral to the state. There was a window that opened some time ago where, actually, State of Illinois allowed these people to come in at the state's cost where they had to pay the employer contribution plus interest. That's not what this does. If she wants to come in or a similar situation where people want to come under this window, they would have to pay the full cost of their contribution, plus what would've been the state's contribution, plus all of the interest in the intervening years."

Miller: "So, going back to Representative Franks' question. Your... it does seem like there would at least be some sense of a cost, not now, 'cause you're basically saying that the... that the employee would pick up all... all of the cost up to today... up to the enactment of this legislation. But what about in the future, though? I mean, I don't..."

Rose: "What... I... I guess that this is a window that opens to allow people to come in. So, this isn't an open-ended

STATE OF ILLINOIS

opportunity. We... actually, I can't take credit for this. This actually came from your staff on... on the other side of the aisle. Amendment #2 is what made this revenue neutral and the pension systems have reviewed it and agreed that it is indeed revenue neutral."

Miller: "The... how many employ... how many people will this affect?"

Rose: "Frankly, not too many. But..."

Miller: "That was scientific."

Rose: "But... yeah."

Miller: "Not too many. Not too many could be five."

Rose: "I... I've got one person from my district that asked. Here's... the thing is, this similar window was open, when was it? Was open several years ago and so a lot of people took advantage when it was open. This particular constituent in mind was not aware that the window had been opened at that time, missed it. Now, she's... actually, when that window was open, the state was picking up the employer contribution plus the interest and all the employee had to do was pick up the employee contribution. Now, this window, they're gonna have to pick up the full cost."

Miller: "But... but you're saying they still don't have an estimate... it's not really... like I said, it's not... as you know, and... and in recent comments by the Governor and administration and Speaker and others, there's been a little crisis in our pension system, depending on who you ask. And I'm sure, ya know, 10, 15 years ago, ya know, if you'd have asked those individuals was it a crisis or a

pending crisis on... on that dollar at that time, they'd say, no. But the concern is not of today, it is actually of the future. Because usually when you're talking about pensions and things like that, there's usually something that you get out and we don't know what that total is. And that's why I go back to at least how many people are we talking about? I mean... you said not that many. I don't... I don't have a clue. I personally don't have a clue."

Rose: "Let me... let me address... you got two questions there."

Miller: "Yeah."

Rose: "Your first question was about the concern of the Speaker and the Governor's Office about the cost of pension liability. Amendment #2 came from the Speaker's staff to address that concern. We attached Amendment... excuse me, Amendment #1... Amendment #1 came from the Speaker's staff to address that concern to ensure that this was not an unfunded liability to the pension systems. That came from your staff and Speaker Madigan's staff. We attached it because I'm in complete agreement, this is not a time to do that. So, one, that addresses your first point. It came from the Speaker's staff, directed at entirely to that question. The second question, Representative Miller, is that this only affects contractual employees of General Assembly Members. So, I guess my suggestion to you is that that's a finite number, particularly in light of the fact that a window like this had been opened previously, that... that most of the folks took advantage of that window then. So, I think..."

Miller: "Representative, let me just... on our analysis, there is no Amendment #2. And... and, Clerk..."

Rose: "Amendment #1, Representative. Amendment #1. Amendment #1 came from your staff, Representative Miller."

Miller: "No, I unders... once again, I understand that you're saying... My understanding of what you're saying, I'm not gonna belabor this and... but... but you're saying to join into this program they're gonna... the employee would pay the cost and the interest as it is today, in today's dollars. But once again, it doesn't say what will happen in the future. And I guess that... that's kind of really the concern that I have here in lieu of the situation that we're in now. I mean, I don't know. I wasn't around 20 years ago. I don't know, that argument might..."

Rose: "Well..."

Miller: "This same argument that you're making is very logical, but it may have been made 20 years ago. Ya know?"

Rose: "But the... but the window closes October 1 of this year. So, I mean, we don't have to address future interest costs at all."

Miller: "Yeah, but once again, without... without... without not knowing the number of individuals who may sign up for this benefit, it just leads to some scrutiny without even giving an estimate of what our costs are gonna be. And you're saying there will not be any costs in the future. And maybe I'm not quite understanding this, I'm not a pension expert. But to me, it would inherently say at some point

HOUSE OF REPRESENTATIVES

there's gonna be an additional cost, as our costs do tend to go up over the years. Ya know. Do you have..."

Rose: "Well, the whole point of having the employee contribution plus the employer contribution plus interest is to make the system's asset pool whole so that it can afford the pension annuity over time. That's how pensions work. So, if you bring yourself to... up to date, which is what Committee Amendment #1 does, which was brought to me by Speaker Madigan, and correctly so, to make this truly revenue neutral, you do that. You bring the asset pool up to today's date and as you go forward that asset pool continues to grow through the investments of the SERS system. So, I... I... all due respect, Representative Miller, I don't quite understand what you're asking me."

Miller: "Yeah, to... to the Bill. I'm gonna make my..."

Speaker Hannig: "Could... yeah, to the Bill."

Miller: "To the Bill. Yeah. I respect the Sponsor and what he's trying to do and I understand... But once again, there is... there has to be concerns on if we're not even knowing how many will sign up within this finite period of time, if we're not really sure of what the numbers are gonna be, we're not sure of what tomorrow may hold, we're not sure what's gonna happen, we don't sure who's gonna be alive, who's gonna be dead to even receive these benefits. It just becomes... in a... in a crisis situation that we're in now, it just becomes at least to some scrutiny. And I do respect the Sponsor and his commitment to Representative

Franks to at least find some... a little bit more detail about this before we vote on this. Thank you."

Speaker Hannig: "So, let's... Representative Rose, there's some interest in the Bill. We'll put it on the Order of Standard Debate. We've now had two speak in response, one more under the rules can speak in response. Representative Fritchey, would you like to speak in response or in favor?"

Fritchey: "I just don't know. My guess is gonna be in response."

Speaker Hannig: "Okay. Okay. Five... five minutes to speak."

Fritchey: "Thank you. Representative, this applies to somebody that is presently a member of another reciprocal system, correct?"

Rose: "Yes."

Fritchey: "But they did not have to be a member of a different system at the time. In fact, they could've been a member of no system at the time, correct?"

Rose: "That's the point, Representative. They weren't eligible to be part of the system at the time."

Fritchey: "I... my... my thoughts on this is, ya know, it's kind of a... ya know, it's a benefit of the bargain issue. Ya know, we can't tinker with people's pensions at the time because that was the deal going in. You knew what your pension was coming into it. These are people that were contractual employees that knew that they were not part of a pension system at the time and they were probably compensated as such. They may have received a higher payment than they

would've gotten as part of their contract because they weren't getting... receiving pension benefits. Correct?"

Rose: "It depends on each individual's circumstances. I mean..."

Fritchey: "Well, here, let... look at the... when somebody signs up for a job they look at their compensation package."

Rose: "Yeah."

Fritchey: "That compensation package may be salary, health insurance, pension, and that all factors into what the job is worth and what you're will... whether or not you're willing to take that job."

Rose: "Agreed."

Fritchey: "So, they were willing to take this job without a pension system. Now at a time... and it's interesting, the juxtaposition here. But I find myself surprised to hear somebody on your side of the aisle, in tough economic times when we have a budget deficit, when we have issues as how we're gonna fund schools, how we are gonna fund basic state services, coming in and adding pension sweeteners onto the system."

Rose: "Representative, this doesn't cost the state anything. That's the Amendment that we put on here. It's revenue neutral. The employee has to pick up their cost, what was... would've been the state's cost plus all of the interest in the intervening time period. I would also add that this was a window that had been opened previously and my constituent wasn't notified of it and so wasn't able to partake in it, otherwise we wouldn't be here today."

Fritchey: "But again, ya know, an... and individual took a job at a specified rate of pay. Now we're allowing them... for that individual there's got to be a benefit. If it's revenue neutral to that individual, they wouldn't go and buy back into this system. Why are we letting them after the fact come in and basically renegotiate their salary package after they've left the job for up to 6 years of back time?"

Rose: "We... well, first of all, we've already done..."

Fritchey: "Conceptual..."

Rose: "...we've already done this once for similar situated individuals. Okay?"

Fritchey: "But why would we..."

Rose: "So, I'm trying to apply a modicum of fairness to... to my individual."

Fritchey: "And... I'm... and I'm not trying to ask you a legal question. Conceptually, why would we let somebody after they have left the job come back and be able to buy into 6 years of pension time that they were never entitled to, nor did they ever expect an entitlement to when they had that job, which they no longer have?"

Rose: "Well, Representative, one, back then it's my understanding that... that legislative aides were not allowed to participate in SERS. Okay?"

Fritchey: "Correct. And they..."

Rose: "So..."

Fritchey: "And they took the job anyway."

Rose: "The rules have changed. But to your previous question, the one you led with on this current round about why anyone

would get this and what they're getting in return if they're gonna buy in, well, that's like any annuity. Ya pay in a lump sum. The interest off the lump sum is then used to annuitize your... your monthly disbursement. So, that's why this is revenue neutral."

Fritchey: "So why would we open up this benefit to this specific class of individuals?"

Rose: "Because, one, it's a matter of fairness because we've done it before, and two, it's not gonna cost the state anything."

Fritchey: "It's a matter of fairness if you're one of the covered individuals. But... but where... where's the... why..."

Rose: "It's a matter of fairness because we opened this window before, my constituent didn't receive a notification, was left out."

Fritchey: "There's a lot of pension windows that have been opened before."

Rose: "In fact, if you want to talk about fairness, the last window that was opened required the employee to only pay the employer cost. This is actually less fair than the previous window that was opened because this employee will have to pay their cost, the state's cost, and all the interest."

Fritchey: "I... I think that it's... Bills such as this that open the flood gates for other groups that want to come in a say, ya know, we'd like the window opened for us. I've been here long enough to see pension Bills come through that start out as a few pages long and wind up bigger than

the Bible is, because every group wants to be able to come in and get the window open for them..."

Rose: "Representative..."

Fritchey: "...to buy in more time."

Speaker Hannig: "Rep... Representative..."

Rose: "Let me address that immediately."

Speaker Hannig: "Representative Fritchey, your five minutes have expired."

Fritchey: "Thank you, Speaker."

Speaker Hannig: "Representative Rose, why don't you finish answering his question."

Rose: "Sure. Representative Fritchey, if I could finish with that... on that note, I made a commitment to Speaker Madigan that if for some reason this Bill were to change in the Senate, it would not be recalled on concurrence. Period. This will not grow, that was the commitment."

Speaker Hannig: "So now under the rules of Standard Debate, we've had three speak in response. Does anyone seek to rise in support? Representative Molaro."

Molaro: "Yes, I... I understand the concerns of people on my side of the aisle. I mean, I think it... ya know, and... and Representative Rose, you're gonna... I think it's important that they get this. It does make sense to me that if someone says, how many people would this affect, we probably should have that answer. Even if it's just an estimate, 'cause that... that is something that we should probably know. But wait... wait... however, that being said, remember, we're talking about just contractual members of

STATE OF ILLINOIS

HOUSE OF REPRESENTATIVES

35th Legislative Day

the... that work for contracts for the General Assembly. Many, many times... I've been doing this for a long time and people come to me and they would work for me but their husband had or their wife had insurance somewhere else. They didn't want to be in the mandatory insurance so they were on contract and they thought they'd work for 3 or 4 years and leave. Then it turns out they did, but they went to work in other forms of government. And the 4 or 5 years that they spent working 40, 50 hours a week in my office, they now, because other people didn't have a spouse and wanted a full-time position, they now know that they probably made a mistake not being in the system. So to come up here now and say they wanna be it makes sense to me. But if we come up and say that there's not gonna be not one single dollar that it's gonna cost the state... so, we answer Representative's... the actuaries come up and they say, this is what it would cost the state. And they say, you gotta pay 100 percent of that money and you gotta pay all of it. I think that makes sense and I think it is a fairness issue for all those people who worked on contract that didn't know better. Now we do and I think if it's fully paid for and it's paid for the bar... the participant, who's now on a sister system, a reciprocal system, I think we should allow them to do it. But I also think we should tell 'em... so I'd vote 'yes' on this Bill, but we should be able to tell when we bring a Bill like this we think it will affect 2 hundred people, 80 people, a thousand people.

I think that's an answer that we should have. So thank you."

Speaker Hannig: "So... so, now we've had one speak in favor and three in response. Do we have anyone else who rises in support? Representative Giles."

Giles: "Mr. Speaker, I'm not sure what my position is but I would simply like to ask a question of the Sponsor."

Speaker Hannig: "Okay. So, we'll let... we'll give you 5 minutes and then we're gonna go to the Roll Call."

Giles: "Representative Rose, ya know, I think I understand what you're trying to do here. I think we've done it before in this Body. You get constituency oftentimes ask are we gonna have another situation in which they can opt out or... or in this particular situation you want to have members to obtain certain credits in order to be able to opt out early. But how would you respond to this particular situation that I think that's going on in the state currently. And that is, there's a lot of vacancies that we have within the various departments, within the various agencies that because of our particular situation in the State of Illinois, there's a budget crunch, we can't fill those positions currently. There's a lot of vacancies, there's positions that we need to fill. Currently, we can't do it because for the simple fact that the budget director simply said we cannot afford to do them. So there are some... whether through attrition, whether through individuals that leave on their own, or whether individual are deceased, we can't fill those positions because of the

STATE OF ILLINOIS

HOUSE OF REPRESENTATIVES  
TRANSCRIPTION DEBATE

35th Legislative Day

current status of the budget. And we're trying to consume those positions to be able to save on those positions, currently. And so, if we allow another opt out plan or a credit plan to be able to have individuals to... to opt out early, now we continuously have a more individuals leaving the area of providing services to needed constituencies in the State of Illinois. How would you respond to a situation like that when we have a very dire situation, currently?"

Rose: "Simple. This doesn't cost the state anything so the analogy doesn't apply."

Giles: "Okay. I... I underst..."

Rose: "I would agree with you. Representative Giles, I would agree with you that if this cost the state money that this would not be an appropriate time to do this. The Amendment we applied, from... at the Speaker's request, and your staff's request, made it revenue neutral. We've had that checked by the systems, actuaries. And they've checked it. Their... their estimates, if I might add to the previous questions, were less than a hundred people would apply because this only affects former legislative aides on contract and there's been a prior window that opened. But because the individual seeking this would have to pay the full cost of that annuity, of that... of that pension payment, of the principal that it would cost to afford that additional payment, there's no cost to the state."

Giles: "Representative, you know, I... and you know, I take your word for it and I think you've always been up front and honest."

Rose: "And I appreciate that."

Giles: "And I believe that it may not cost the state anything financially, but I'm worried about the service side of it, providing services. The shortage of workers in the State of Illinois providing services to the... to this constituency. I'm worried about that. And... and currently, we cannot fill the positions that is vacant right now in the state because of the budget situation. So, I'm more concerned on the service... being able to provide good services so that individuals not be harmed or injured on the job or... or individuals would not be overburdened because there is a shortage in various department and agencies, currently. So, that's more to my... and I..."

Rose: "And I don't understand..."

Giles: "And I agree with you, it may not cost the state any money. But... but, you know, just like you know, I know constituency comes to us often and they want us to introduce legislation because they want to opt out, they want to be able to retire early and..."

Rose: "Well, this..."

Giles: "...and reap full benefits."

Rose: "This individual's long since left the employment as a legislative aide. I mean, this was in the early 1980s that she was an aide to Representative Wikoff. Long, long ago."

Speaker Hannig: "Thank you. So, under the rules of Standard Debate we've had now three speak in response and... and three speak in favor. And Representative Rose is recognized to close."

Rose: "Thank you, Mr. Speaker and Ladies and Gentlemen. I would like to say that, sort of reviewed our notes, that the estimate is less than a hundred that the actuaries are based upon, and that makes sense if you think that this would only apply to prior contract aides to State Representatives. One, so far back in time before SERS was even applicable to legislative aides. And two, a window has already been opened for them. So, the number of people eligible will be finite. Secondly, this is revenue neutral, Committee Amendment #1 ensures that. That's been fact checked by the... the folks at the pension system. They came to committee, testified as such, and this is revenue neutral. Some people have asked me to make guarantees beyond what the committee... the pension systems themselves say. I don't know how I can do that. The pension systems tell me it's revenue neutral. I think we all rely on them every day in making decisions here that it would be revenue neutral. I would also add that actually in one way this will help enhance the state's cash position because after this employee passes on... goes through retirement and passes on, they will leave this additional amount of money deposited into the State Pension Fund as an asset to help offset future costs. So in a way, this actually helps... helps enhance the state position. Admittedly, not very

much, but certainly it's... it's not a cost. So, I... I would simply ask for the favorable adoption of this Bill. Thank you, Mr. Speaker."

And this was good legislation, it prevented car thieves from stealing your car. But with the advent of technology and you leaving your locked vehicle out in front of your home, from your kitchen table you can now start it. Under current law... under current law, you'd be in violation. What this does is just fix it. It's designed for Representative Flowers to start her vehicle in the dead of winter and leave it running."

Schmitz: "Thank you, Speaker, Ladies and Gentlemen of the House. 3593's a... to quote some of my other colleagues, a very simple Bill. It allows a mechanic, instead of having to send a notice of lien to every person in a condominium complex over eight units, to send it to the board. Many time these contractors do a lot of work that are authorized by the board and they have to send these notices to every single unit in the building. This would limit them to just doing it to the association. It does require the association to have this notice distributed to its occupants within 7 days, under the Amendment we just adopted yesterday. I'd be happy to answer any questions."

Speaker Hannig: "And on that question, the Representative from Cook, Representative Lang."

Lang: "Thank you, Mr. Speaker. I just simply rise in support of the Gentleman's Bill. It's a good piece of legislation, will afford condominium owners the notice they need to be aware that there's a lien against the building but will enable the lien to be perfected more quickly, enabling both sides to get the matter resolved. And it is food for them, but they need it intravenously in order to stay alive because they cannot eat it orally."

Parke: "Well, you had a food supplemental Bill last year. What happened to that Bill?"

Flowers: "Well, I'm glad you asked because it passed out of here last year, but it just didn't go any place in the Senate."

Parke: "Did it pass unanimously or was there opposition? Did people vote against it?"

Flowers: "I can't recall, but I couldn't imagine you voting against it."

Parke: "Well, how 'bout... what is the definition of 'pain medication', Representative?"

Flowers: "Well, pain medication would be what would be prescribed by the doctor that he feels... or he or she feel that their patient may need in order to stay alive, because sometime the pain could be so bad that it could cause a person's death."

Parke: "Well, I mean, isn't... why wouldn't that be covered under the plan already?"

Parke: "Now, that doesn't make sense to me. If... if somebody is ill and they are in pain, that the doctor ought to be able to prescribe pain medication and take care of that. I'm... Where in your Bill does it show what the definition of 'pain medicine' is?"

Flowers: "It..."

Parke: "Is it in the Bill?"

Flowers: "I don't know if it's in the Bill, but it... let me just check. Because it does say for pain medication, Section 356z.10, pain medication coverage. It describes a group or individual policy, accident insurance, managed care. It says that provide coverage for prescription drug... must provide coverage for any pain medication prescribed or ordered by the insured treating physician."

Parke: "Well, is that a definition? I don't... it just says... it talks all around it. It doesn't say what 'pain medication' is."

Flowers: "Well, I would assume that we would..."

Parke: "Is it aspirins?"

Flowers: "It would re... if the doctor... I would assume that the HMOs or the insurance companies may be paying for aspirins, I'm not sure. But whatever it is that the doctor feel that that patient may need."

your Bill or can they have any kind of a... some kind of a medication that a doctor might prescribe, that he thinks he might have a home remedy himself? Is there any... does this have to be a... sold over the counter or a... how do we define what that is?"

Flowers: "Well, once again, I would allow the hospitals or either the doctor to define what is 'nutritional supplement' in order that is needed for that patient to stay alive."

Parke: "To the Bill. Ladies and Gentlemen, the Sponsor has a Bill here that is extremely comprehensive and costly. There is no definition in the Bill of what is a 'prescription nutrition supplement'. There is no definition of what is 'pain medication'. This Bill is an open door to anything that... without anybody being able to say, 'Well, wait a minute, are you sure this is what we want to do.' I understand what the Lady's trying to solve but I must rise in strong opposition to this Bill. Almost every business group in the State of Illinois is strongly opposed. I mean, the list here goes on and on and on of opposition to this. Caterpillar, the Chamber, the IMA, Catholic Conference, CIGNA, WellPoint are all in opposition to this idea. And I'll be happy to answer any questions."

Davis, M.: "Representative, can you tell me why you wanna educate the judges on only one drug? Why would you want to educate them on the possession of only methamphetamines?"

Brady: "Well, Representative, from hearings that were held throughout the state on this particular issue, the problem of methamphetamine in the opinions of most of those in the particular areas dealing with law enforcement, dealing with counseling and substance abuse, found this to be one of the fastest growing, if not the fastest growing, problem in the State of Illinois. One of the areas out of the task force that was identified was training for not only our... specialized training for not only the judiciary, but also for the prosecutors in the state. This happens to be the particular piece of legislation dealing with that initiative of training for judges, specifically for methamphetamine."

Davis, M.: "What kind of training exactly would they receive? I mean, exactly... if I were a judge and you're gonna assume I don't know very much about this particular drug, what kind of training would I receive?"

Brady: "Well, the training would be set up by those who have special knowledge not only from the law enforcement side, but also, Representative, from the side of what this particular drug is. So, that would be substance abuse, that would be those in the toxicology area and understanding what this particular drug is all about. To help to identify to the judiciary what this substance actually is, how the substance affects the body, what it

does, and how it can be combated in this state. To give them special knowledge to have better understanding of the... the particular drug from the bench."

Davis, M.: "So, let me ask you this. Should they treat the methamphetamine users... should the judge... now, this is important. Should the judge treat the methamphetamine user differently than the cocaine or crack user?"

Brady: "I don't know that the intent of the legislation is to treat anyone different. It's to help educate specifically the judiciary of a particular drug that's been identified by hearings throughout the state of being a drug that is the number one problem in the State of Illinois right now. I don't think it's singling out any special treatment, per se. We're trying to help educate the judiciary a specific drug in this state that is a new phenomena and that they need to be aware, and that's what the task force... one of the findings were."

Davis, M.: "So, we must assume then that judges are not cognizant of the effects this judge ha... this drug has on people?"

Brady: "Well, I think the whole purpose of education is not to assume anything. The purpose of the education is to educate the judiciary in what was identified as a problem throughout the state, a problem that in certain areas especially in this state is in the courtroom and in front of the judiciary with very little training, very little understanding of what the drug does, how it affects the body, and all types of particular areas that are important

for the judiciary to understand. And... and I think that's what the attempt of the legislation is as well as a similar Bill I'm gonna have to do the same for prosecutors. It's a very unique situation of how this drug has grown and how this drug..."

Davis, M.: "Can I ask you then..."

Brady: "...affects the Body."

Davis, M.: "Could you add crack cocaine to this piece of information that you want judges to be aware of? You know, maybe... maybe they need a lot of information on crack cocaine also because that's a jud... that's a drug that was destroying lives and continues to do so. I think those who are on crack cocaine suffer the same ravages in their body and their mental capacity as the methamphetamine drugs do. And I really believe that you should add the crack cocaine to the knowledge base of the judges and the prosecutors who will be making decisions about those involved in these two plagues on our society."

Brady: "Representative, what I will be glad to do is look to see if there's something that could be done in the Senate with this particular piece of legislation were to move over. Identifying not only what the particular protocol, criteria would be for the education for judiciary and whether or not expanding of this particular piece of legislation for other drugs may be possible. I'll be happy to do that. I cannot give you that hundred percent guarantee, but I'll certainly look into doing it."

Speaker Hannig: "There seems to be enough interest in the Bill to put it on the Order of Standard Debate. So, Representative Fritchey is recognized for five minutes."

Fritchey: "Thank you, Speaker. And with all deference to the prior speaker, I rise in strong support of this legislation. Ladies and Gentlemen, last year I had the opportunity to go down to Edgar County, to go down and talk to them about farm issues, or so I thought. And I went to talk to an agricultural supply business down there and the first issue that they raised with me was the issues that meth was creating for them by having chemicals stolen. There is a difference between meth use and crack cocaine or cocaine or marijuana. The building that houses the crack dealer does not become a HAZMAT site as does that that houses the crystal meth dealer. Crystal meth is becoming a devastating problem to this state. It is now starting to show its head in the City of Chicago. For those Chicago Legislators that think that this is a downstate issue,

you're wrong. It is an Illinois issue, it is quickly becoming an urban issue. We have had some recent tragedies on the north side of Chicago, we are going to see more of them. The judges do not have the decades of experience in dealing with meth situations and the devastation created that they've seen with cocaine and heroin and other drugs. We need to give our prosecutors, we need to give our judges a better set of tools to meet with a worse kind of drug. This is one of those tools and I applaud the Sponsor. Thank you."

Speaker Hannig: "Representative Graham."

Graham: "Thank you, Mr. Speaker, Ladies and Gentlemen of the House. I rise in support of the Gentleman's legislation. I would also like to see this Bill possibly expanded. Meth is a issue and we know that it is spreading across the State of Illinois. But I'd also like to see the drug courts in Cook County be funded so that there is an alternative, so we're not locking up all the people who are addicted to various substance. If the drug courts can provide an outlet and treatment programs for people who are addicted to various substances, I'd like to see this Bill expanded to talk about other substances, not just methamphetamine. So, I rise in support of the Gentleman's piece of legislation and I urge an 'aye' vote."

reduced and adjusted accordingly. I think a couple days ago, myself and a couple colleagues had some specific questions as relates to this Bill. This is actually... some of the questions that were... that were asked, it actually is already in the statute. So, I would encourage an 'aye' vote."

Dunkin: "Correct. And what that does simply is, if any one of us, as civilian, wants to make an adjustment in child support, either with more or less child support, you have to have a hearing first. And as relates to this piece of legislation, whether you're in the military or not, what this would do is it also will allow you to have a hearing to make a lower adjustment or a higher adjustment. So actually, I think your questions should be answered with this."

Mulligan: "What Amendment did you add that made that possible?"

Dunkin: "You know what? There was no need to, after further investigation, Representative, to make an adjust... an Amendment because it's already in the law. Hopefully, ya know, you can take the time and look at the legislation... the law that we passed out. It should bring some clarification."

Mulligan: "So why... but why do you need the Bill if they already can do this? Are you just trying to recognize this as a hardship condition? Which then, I think the Bill should've been drafted differently. And the other issue that was of concern to me is when the service person who has the obligation for the child support returns, what does the custodial spouse have to do to get the order reinstated? If they have to go to court and spend money, I don't think that would be fair."

Dunkin: "No. That's... what... when they return back to their place of employment... You know, right here in this Body we passed a law that says just because an individual is seeing

Mulligan: "Representative Dunkin, I know you have a very good heart in this whole matter, but I still have the same reservations about it that I did the other day. And I think a lawyer advocate brought to the issue as opposed to a serviceman bringing you this issue... how many servicemen or women have brought you this issue that they feel that they need their child support reduced?"

Dunkin: "You know, Representative, really... you know, in regards..."

Mulligan: "Do you want to say 'none' but you just don't know how to say that or...?"

Speaker Hannig: "There's enough interest, Representative Dunkin, to put this on Standard Debate. And so, the Chair will recognize now Representative Bost."

Bost: "Thank you, Mr. Speaker. Will the Sponsor yield?"

Speaker Hannig: "He indicates he'll yield."

Bost: "As I read this... and as a veteran, ya know, I feel like we're pittin' kinda two positive groups against each other here. Representative, why is it that the person that has that reduction in pay can't just go to the courts or... they can go to the courts right now, is that correct?"

Dunkin: "Mm hmm."

Bost: "Why wouldn't we just want to leave the wa... the law the way it is? Because... because, ya know, the judges have dealt on a one-on-one basis with these individuals before."

Dunkin: "You know, it... it's actually... it's... they can do that. They definitely can do that but it's not current law as it relates for military."

Bost: "No. No."

Dunkin: "I'm sorry."

Bost: "That's not true."

Dunkin: "It's a current practice, it's not the law. They tend to do it anyway."

Bost: "Right. That... right now, if... if you're any other job where all of a sudden you have a reduction in pay, you can actually go to the courts and request to... to be reviewed and then have that child support reduced. Now, we're saying because this person's on military we're gonna turn that over to somebody besides the judge and we're just

automatically going to reduce it without allowing the judge the opportunity... who knows the case and knows the situation and can look over the evidence of... of why the child support is being paid the way it is, and then we're gonna reduce the amount of child support for these children."

Dunkin: "Ya know, Representative..."

Bost: "Without the court."

Dunkin: "I just wanna... I just wanna make some clarification. It's not an automatic. I mean, they have to apply or they have to go through a hearing, the military personnel... hopefully they can, if they're not... unless they're called to be there within a very short period of time and the... and there's a short window there. If the President says, look, we need you over in Iraq right now, obviously, going through a hearing is gonna be a bit of a challenge. But we're trying to do is... you know, for individuals who are serving 30 days or more, we're simply trying to make sure that there's no false arrearages for an individual who happens to be called for active duty, again, for 30 days or more, and them not being penalized just because they're over serving this country. And I think there was another quest... you know, hopefully that ans... answers your question."

Bost: "Well, it... kind of, but not really. And the reason why I'm saying this is, is because if we're going to go to the state making this ruling and not a judge, is that a violation of the Constitution and the separation of powers? Maybe... maybe somebody who is more of a constitutional

expert could... could answer that. But... but I see a problem here."

Dunkin: "Yeah. All we're doing here, Representatives, is we're making this current law. I mean, it's current practice, we're just codifying this. They do it anyway. We're simply trying to make sure that there is no... no in the loophole or there's no gap or no one runs into a negative arrearage where they're... next thing you know... ya know, if they serve 2 years, they come back and they're woefully behind their child support payments because they were serving 30 days or more over in active duty over... ya know, at time of war, that they're not falsely, really penalized just for not having... just... just because their salaries for the month have been slightly adjusted."

Bost: "Okay, you're making my point exactly. All right? My point is that the judge already knows these things. The judge already has the power to reduce this. All that person... what the military has to do is contact someone on their behalf to petition the court to go in, to take and get a reduction, which is already in the... in the law. By putting this in the law, now all of the sudden, from what I'm understanding, you're... you're doing automatically. And... and you're doing through a state agency. Explain to me where I'm wrong. How does a judge... does this auto... we're trying to tell a judge automatically that he has to change this. Or am I wrong?"

Dunkin: "Okay. All we're doing is we're codifying the law because... and it's current practice right now. I mean,

we're saying... we're pretty much saying the same thing. It's current practice right now. Now... but let's say that there's a new department head in Illinois Department of Public Aid and it's not current practice there. What we're simply trying to do with this piece of legislation is to see to it that we do not leave anyone, male or female, who's serving this country overseas the benefit of the doubt in terms of them having their military pay reflect their child support payment."

Speaker Hannig: "Representative Bost, your... your time is expired. And Representative Dunkin, you can finish answering the question."

Dunkin: "Thank you. So, again, all this Bill does... simply, it's not to harm any children. It's not to make a dramatic financial change intentionally to negatively have a... have a not... a not so good impact on children. This legislation simply codifies the ability for an individual serving in the military, active duty, to adjust their child support payment according to their new payment... monthly payment. And it happens to be in the military. And I... I think, you know, that's the least that we can do for individuals who are serving this country, who have been obviously taking... trying to take care of their kids with a particular amount of child support payment. And I think it's a... it's a good measure and it does not leave anyone vulnerable. As a matter of fact, just to... ya know, actually, in... couple days ago there was..."

Speaker Hannig: "Representative Dunkin, I asked you to finish answering the question, but I think you've gone a bit beyond that. So why don't we allow some other speakers to... to ask some questions. The debate will continue. So, we've had two now speak in response. Representative Lindner, do you rise in support or in response? Surprise me."

Lindner: "I rise with some questions, Mr. Speaker."

Speaker Hannig: "Okay."

Lindner: "All right. Will the Sponsor yield?"

Speaker Hannig: "He indicates he'll yield."

Lindner: "Thank you. You are say... is everything that's in your Bill the current practice of Public Aid right now?"

Dunkin: "It's prac... yes. They practice it right now. It's not... it's not law."

Lindner: "All right. But do they do this... now do they have this form and everything that somebody fills out in the military and... and notify military personnel and send them the forms?"

Dunkin: "Correct. That's what the Bill would do."

Lindner: "They already do this?"

Dunkin: "Correct."

Lindner: "Okay. And do you know what is the process, how many hearings have they had?"

Dunkin: "I mean, I would imagine it's the same as any civilian going through a child support adjustment hearing."

Lindner: "You have a good imagination but do you know?"

Dunkin: "It's really... all... all we're doing with this is we're simply codifying any adjustment to award child support payment for... and this just happened to be for individuals who are serving the country overseas, such as Iraq, such as Afghanistan. So... so, they do it already. We're simply trying to put it into law and really make it stand for something as teeth."

Lindner: "Okay. Vis-à-vis the questions that Representative Bost asked, Public Aid is going before a judge, right? They're going before a regular court. They're aren't doing this administratively. It's the regular court process?"

Dunkin: "It's an administrative process our... with the Department of Public Aid."

Lindner: "Okay, so they aren't going before a judge. They aren't going before a judge."

Dunkin: "The Federal Law requires they have administrative hearings. So what the state is doing is actually doing what the federal... codifying what the Federal Law is doing, quite frankly. So, I guess... you know, the concern is... is... ya know, if there's a concern that children will be somehow be neglected, that's not the case with this here. I mean, no one wants to be a part of neglecting any kids, especially when there's individuals who are already paying

child support. This is a slight codification and its adjusting the military pay in their... their child support payment."

Lindner: "All right. If... if this is already Federal Law and Public Aid is already doing this, why do we need this? Why do we need your Bill?"

Dunkin: "What we're doing is... we need this law because if there's a change in executive leadership in the Department of Public Aid or in the Governor's Office, this may not be standard practice. And so, what we want to do is to codify it so... but their... so..."

Lindner: "But if it's a Federal Law I would think that whoever comes into the Department of Public Aid is going to follow it."

Dunkin: "You know, the federal... this is Federal Law, really. The federal... so the Federal Law already protects children from being neglected as it relates to child support payment. And all we're doing is coming into compliance with that, more or less."

Lindner: "Do you have any idea in the administrative hearings that they've had how many times the respondent shows up and if there is a full hearing pursuant to the Illinois Marriage and Dissolution Statutes and the criteria that are in those statutes?"

You may recall that this Bill was called several weeks ago and Representative Fritchey's (sic-Fritchey) and Molaro had some concerns with and we took it out of the record and got together and discussed the Bill and alleviated their concerns. In essence, what it does is it makes aggravated battery to a peace officer a Class X felony as opposed to a Class II felony. I would point out that the Cook County State's Attorneys Office remains in opposition to the Bill. We could not come to an agreement. My argument is simply that Chicago has a different standard than much of the rest of the State of Illinois and a Class X felony, when somebody brings great bodily harm to a police officer, is a very legitimate punishment for a person involved in that situation. I would be pleased to answer questions."

When he brought this Bill up, I believe it was last week, Representative Molaro and I had some sincere questions about the legislation. He was gracious enough to take the Bill out of the record and he met with Representative Molaro and myself, as well as his staff. We got our questions addressed. We were actually in error. This Bill is not only correctly crafted, it's an important piece of legislation that provides for appropriately stiff penalties for somebody that does commit great bodily harm to a peace officer. So I thank him for being a Gentleman. I thank him for bringing this Bill. Thank you."

Speaker Hannig: "So, Representative Froehlich is recognized for 5 minutes."

Froehlich: "Thank you, Mr. Speaker. Would the Sponsor yield for a question?"

Froehlich: "...at... at \$22 thousand or so a year per inmate, I think it... it's foreseeable, if this does what you think it might, that we're gonna incur some greater costs. I like to at least have a number so we can then decide is it worth it to spend 'x' million more dollars for this purpose that we then cannot spend on some other purposes 'cause we won't have it available."

Sacia: "I... I appreciate your comment, Representative Froehlich. I guess my answer would be in a crime such as this, when you bring great bodily harm to a law enforcement officer, I guess my answer would be from a personal standpoint, finances should not come into play. A justifiable sentence to somebody that takes an eye out, puts a person in a wheelchair, breaks a neck, whatever the case happens to be, to only face a penalty of up to 7 years as opposed to up to 30 years, I really, personally, believe cost is not of the concern here. I would draw an analogy, if I might. We just passed legislation out of this Body to spend, my recollection is, somewhere in the neighborhood of 5 or 6 million dollars to put more guards in this facility due to the tragic loss of a security guard. And I think we all stood in very strong support of that because we saw the need for the protection of not only our Capitol, but for this Body. And I think by going to a Class X felony, as

opposed to a... to a Class II felony, we send a strong message to the criminal that if you bring great bodily harm on a law enforcement officer you will suffer the penalty."

Froehlich: "Thank you."

Speaker Hannig: "Representative Graham."

Graham: "Thank you, Mr. Speaker. Will the Sponsor yield?"

Speaker Hannig: "He indicates he'll yield."

Graham: "Representative Sac... Sacia, does this Bill take into account possibly someone who may have a mental illness that may attack a peace officer?"

Sacia: "Representative Graham, certainly... you know, a hearing would be held to determine the mental stability of an individual. All this is doing is it's simply taking the penalty phase, which is currently a Class II, up to a... a Class X. And... and certainly, if there was deemed appropriate that the person involved was mentally ill, that hearing would take place prior to any type of sentencing."

Graham: "So this piece of legislation does not remove any judge's discretion. So the judge would have an opportunity to rereiw... review the case and to determi... to determine whether this is an excessive crime or..."

Sacia: "Absolutely."

Graham: "...whether this is intentionally done. So, you're saying upon... after a proper review of a jury or whoever is looking at this, they will then determine whether this person knowingly committed bodily harm of a pe... poli... a peace officer and at that point they would, you know, then evaluate accordingly?"

type of individual but not somebody else. Now what we're doing is elevating farm equipment to the same level as school property or religious property. And I guess, I'm trying to get at... I guess, (a) where does it come from, and I guess, (b) where does it stop? Is this an important Bill to the agricultural community? You bet it is. But..."

Mitchell, B.: "Representative, I appreciate your question. Yes, it is. The genesis of the legislation was during harvesting season, which is a shortened period of time in the fall, farm trucks sit out in the field. In two separate instances in my legislative district, in McLean County and in Macon County, the farmers had their trucks out and we had a... an act of vandalism. They set the farm truck on fire. The farmer only has one truck and he cannot get the crops out of the field and, ya know, you have a rainy season. He's at some financial peril."

Fritchey: "And I... and I... and I understand that. And my problem isn't so much with this piece of legislation as much as the next inevitable piece of legislation, which is, ya know, if a vehicle gets vandalized that happens to be used for that individual's line of work, whatever it might be, it might be a construction worker that lives in Chicago and says..."

Mitchell, B.: "Sure."

Fritchey: "...if his pickup truck gets vandalized and he uses that in his means of employment then that should be a heightened penalty as opposed to just somebody's recreational vehicle. Do you... do you get where I'm going?"

Mitchell, B.: "Yeah, I... I understand your... your point of view. The difference, in my opinion, with this legislation is that it recognizes that agriculture, whether you live in Macon County or Cook County, is certainly very important to the economy of the State of Illinois. About one out of four jobs in Illinois is dependent on agriculture. This is just the recognition of that fact. You're shaking your head and I..."

Fritchey: "And... and... and there is not a question in my mind as to the import of agriculture to this state. But ya know what? If you're a butcher, then being a butcher's important to the economy. If you're a baker, whatever it may be. And I... you know... and I guess, you know, if we were... if we were saying that vandalism to a vehicle used in somebody's occupation should be a heightened penalty, that's one thing. And... and again, and I realize I'm giving you questions you can't really answer. But when we start to do this by profession and say if you're damaging farm vehicle, it's a heightened penal... penalty. If you damage school equipment or religious equipment, it's a heightened penalty. But, ya know, we're gonna... we're gonna start to break this out. The next Bill will be for the construction trades, then maybe for the railroads, then maybe for whoever it might be. And we're just making this really, really complex."

Speaker Hannig: "The Lady from Cook, Representative Jones."

Jones: "Thank you, Mr. Speaker and Members of the House. House Bill 2374 is a Bill that was brought to me by a coalition of providers of family case management. And what the Bill does, it essentially codifies and strengthen the program that has been existence for more than 15 years in Illinois. As the Bill is amended, the Bill would provide that with appropriate funding it could save kids through the age of four. Right now, kids are saved through the age of one and moms are covered. Prior to 1993, these kids were covered but due to budget costs at that time they were taken out. or do you have funding source for this additional \$69 million that is gonna cost the State of Illinois?"

Parke: "I'm sorry, what did you say?"

Jones: "I said the increase that you just talked about, from 44 to 69, it depends upon the availability of the funding. And that also was worked out with the Department of Human Services."

Parke: "Thank you. To the Bill. Ladies and Gentlemen, again, we have an idea that has merit. I mean, we wanna help people that have problems in this state, but we can't afford the Lady's legislation. Now, you all can vote for this if you want, and I guess you will. I'm not going to. It's gonna cost approximately \$69 million, which we don't have. And we continue... I mean, the Gov... Governor, you're gonna have to veto this Bill if it gets on your desk 'cause there's no money for it. And we continue to raise expectations of the people that we're trying to help. And I don't blame anybody for trying to help their constituents, but this Bill is way too expensive. We can't afford it and I would respectfully ask the Body to vote 'no' or 'present' on this Bill. And hopefully, one day when the state is in a better financial position, we can expand these kinds of programs. But at this time, this state cannot afford this program."

Speaker Hannig: "Representative Parke, you've spoken in debate. For what reason do you rise?"
