

100TH GENERAL ASSEMBLY

State of Illinois

2017 and 2018

HB4103

by Rep. Dan Brady

SYNOPSIS AS INTRODUCED:

See Index

Amends the Board of Higher Education Act. Requires the Board of Higher Education to establish a uniform admission process online, which must be used at all public institutions of higher education; sets forth what components this admission process must include. Requires the Board (i) to ensure that any high school student in this State with a 3.0 cumulative grade point average or better on a 4.0 scale (or the equivalent on a 5.0 scale) receives access to the opportunity of higher education and (ii) to guarantee admission to a public university; requires cooperation by the State Board of Education, high schools, and public universities. Requires the Board to conduct a study of the academic programs offered at each public university campus. Sets forth the Board's duties concerning the study. Requires the Board to use the results of the study and other specified factors to determine which academic programs should be prioritized at campuses of public universities and to create and designate Higher Education Strategic Centers of Excellence. Requires the Board to work with the Illinois Community College Board to develop recommendations to integrate community colleges into this plan. Sets forth additional Board of Higher Education duties concerning evaluating programmatic expansions and new programs and studying student financial aid and multi-year budgeting. Amends various Acts relating to the governance of public universities to make conforming changes.

LRB100 14822 AXK 29642 b

FISCAL NOTE ACT
MAY APPLY

STATE MANDATES
ACT MAY REQUIRE
REIMBURSEMENT

A BILL FOR

1 AN ACT concerning education.

2 WHEREAS, The goal of this Act is to protect quality; reduce
3 duplication, redundancy, and inefficiency; protect ranked
4 programs and the invaluable nature of public higher education
5 research; and otherwise ensure that this State is prioritizing
6 tax dollars to protect its higher educational strengths,
7 eliminate its weaknesses, and ensure that Illinois maintains a
8 highly educated, visibly skilled workforce ready to take
9 advantage of opportunities for economic and social betterment;
10 and

11 WHEREAS, According to historical enrollment data contained
12 in the State of Illinois Budget Books prepared by the
13 respective Governor's Office of Management and Budget, as well
14 as full-time-equivalent enrollment figures compiled and
15 produced by the Board of Higher Education and the Illinois
16 Community College Board, statewide full-time-equivalent
17 enrollment at Illinois public universities and community
18 colleges has declined by approximately 50,000 students from
19 1991 to 2014; and

20 WHEREAS, According to an American Academy of Arts and
21 Sciences 2015 publication entitled "Public Research
22 Universities: Changes in State Funding", nationally, higher
23 education's share of nationwide general fund spending has
24 fallen significantly since 1990; and

1 WHEREAS, The same publication showed, between 2008 and
2 2013, that, nationally, appropriation support among the 50
3 states for public education per full-time-equivalent student
4 declined by 26% at the median public research university; and

5 WHEREAS, According to the Academy's publication, "[i]n
6 all, forty-six states cut support for public higher education
7 per FTE student between 2008 and 2014, after adjusting for
8 inflation"; and

9 WHEREAS, The Academy's report notes that "these cuts were
10 deep: thirty-six states cut inflation-adjusted spending per
11 FTE student by more than 20 percent, nineteen cut by more than
12 25 percent, and ten cut by more than 30 percent"; and

13 WHEREAS, The Academy's analysis observes that "[t]he
14 decline in support in part reflects difficult choices states
15 have made in response to mandatory spending programs like
16 Medicaid, rising pension contributions, and a desire to
17 preserve K-12 education"; and

18 WHEREAS, The same study found that, nationally, "the
19 Medicaid share more than doubled, from 9.5 percent to 19.1
20 percent" and "[s]tates now spend more than twice as much on
21 Medicaid as they do on higher education"; and

1 WHEREAS, According to data contained in the State of
2 Illinois Budget Books prepared by the respective Governor's
3 Office of Management and Budget, Illinois spending for higher
4 education increased a net \$1,100,000,000 from general funds
5 from fiscal year 2005 to fiscal year 2015, with all increases
6 attributable to rising State Universities Retirement System
7 contributions, as during this time funding for operations
8 declined; and

9 WHEREAS, In a May 3, 2017 U.S. News & World Report article,
10 entitled "10 Colleges with the Highest Tuition for In-State
11 Students", Jordan Friedman states, "[a]mong the 316 ranked
12 public colleges that submitted these data to U.S. News in an
13 annual survey, the average tuition was about \$8,893 for the
14 2015-2016 academic year"; and

15 WHEREAS, According to the article, for the 2015-2016
16 academic year, the amount of in-state tuition and fees charged
17 by the University of Illinois at Urbana-Champaign was \$15,626,
18 almost double the national average, which makes the University
19 one of the 10 most expensive places in America for in-state
20 tuition; and

21 WHEREAS, According to the 2015 Senate Democratic Caucus
22 Investigative Report on Executive Compensation at Illinois

1 Higher Education Institutions, in-state tuition nationwide at
2 public institutions rose 67% from 2000 to 2011, after adjusting
3 for inflation; and

4 WHEREAS, This same publication showed that, from 1978 to
5 2008, the cost of living doubled and medical costs ballooned
6 roughly six-fold, but college tuition and fees saw a nearly
7 ten-fold increase; even after adjusting for financial aid, the
8 amount families have to pay for college has skyrocketed 439%
9 since 1982; and

10 WHEREAS, The Senate Democratic Caucus report noted that,
11 while state operating support for public universities has
12 declined by 7% between Fiscal Year 2005 and Fiscal Year 2015,
13 the corresponding increase in tuition and fee revenue during
14 the same time period has not only offset state budget cuts, but
15 sustained the annual public university revenue growth rate in
16 excess of 5%; and

17 WHEREAS, The Executive Compensation report showed that the
18 University of Illinois, for example, between Fiscal Year 2005
19 and Fiscal Year 2015, has seen a \$36,000,000 or -5.2% decline
20 in State funding, while revenues from tuition and fees has
21 increased \$668,000,000 or 155.5% during the same time period;
22 and

1 WHEREAS, Since the 1960s, the State of Illinois has been
2 the second highest net negative exporter of college students in
3 the United States, according to "Residence and Migration of
4 First-Time Freshmen Enrolled in Degree-Granting Institutions"
5 by Samuel Fall Barbett with the National Center for Education
6 Statistics; and

7 WHEREAS, According to a 2010 United States Department of
8 Education examination, 24% of the 2008 fall freshman class from
9 Illinois out-migrated; this was 6% higher than the national
10 average of 18%; and

11 WHEREAS, In terms of academic preparation, the students
12 deemed most ready for college, those with the highest GPA, the
13 highest ACT scores (specifically higher ACT mathematics
14 scores), and higher aggregate academic performance, generally
15 had the highest rates of out-migration, according to "Using
16 Hierarchical Generalized Linear Modeling (HGLM) to Establish
17 the Determinants of Out-Migration" by R. Adam Manley, Cecile
18 Dietrich, and Eric Lichtenberger); and

19 WHEREAS, Manley et al. notes that "[t]hirty percent of high
20 school graduates who matriculate to four-year colleges do so at
21 out-of-state institutions"; and

22 WHEREAS, According to research done by Manley et al.,

1 "Illinois ranks 49 out of 50 in net migration with [an]
2 estimated loss of 9,773 freshmen", making the "outmigration
3 rate much higher than the national average"; and

4 WHEREAS, Each year, Indiana, Iowa, Wisconsin, Missouri,
5 and Michigan seem to consistently attract approximately 50% of
6 Illinois migrant students according to "Outmigration and Human
7 Capital: Homeward Bound or Gone for Good" by Eric Lichtenberger
8 and Cecile Dietrich, 2014; and

9 WHEREAS, Lichtenberger and Dietrich also note that the
10 migration of college students is particularly relevant to
11 Illinois, because the state exports more high school students
12 to colleges in other states than it imports. The consequences
13 of this net-outmigration pattern is important because research
14 shows that not only do college students contribute to state and
15 local economies through their tuition and daily living
16 expenditures while attending college, a majority who attend
17 colleges in other states are less likely to return to their
18 home state to live and work after graduation; and

19 WHEREAS, According to data provided by the Department of
20 Employment Security, there are approximately 150,000 job
21 openings in Illinois per year that require less than a
22 bachelor's degree, but many who would otherwise apply for said
23 jobs lack the necessary workforce skills and training to apply;

1 filling the skills gap will become even more critical in coming
2 years, as manufacturing equipment becomes more technical,
3 requiring an even higher aptitude for math and computer skills;
4 and our community college system fills a critical need in
5 quickly training and preparing individuals for these jobs, in
6 addition to being a pathway to a bachelor's degree; and

7 WHEREAS, As an example of the economic cost of
8 out-migration, in 2000, Illinois lost 4,781 students to other
9 states, and this out-migration of 4,781 students equated to an
10 estimated lifetime loss of \$776,400,930 in tax revenue (income
11 & sales tax) to the State of Illinois, according to "Estimating
12 the Economic Impact of College Student Migration from Illinois"
13 by Ryan Smith and Andrew Wall; and

14 WHEREAS, During the same time period that (i) this State
15 has seen such significant decreases in enrollment, (ii)
16 nationally and in Illinois, funding trends have declined for
17 operations, and (iii) educational costs have outpaced
18 inflation, all leading to higher and higher tuition costs for
19 students, the amount of campuses and course offerings have
20 continued to increase across this State and this State has a
21 major excess in capacity in its current higher education
22 system; and

23 WHEREAS, In the University of Illinois's Fiscal Year 2018

1 capital budget request, one priority is a new \$82,600,000
2 Science, Technology, Engineering, and Mathematics (STEM)
3 building at the Springfield campus, despite the fact that the
4 Board of Higher Education's Capital Working Group priorities
5 already include \$112,000,000 for a new science building at
6 Eastern Illinois University, \$118,000,000 for a science
7 building at Western Illinois University, and \$66,000,000 for
8 construction of a Computer Science, Health Informatics, and
9 Technology Center at Northern Illinois University; and

10 WHEREAS, Illinois' public higher education system should
11 operate as a cohesive system, creating strong economic engines
12 in every region of this State; and

13 WHEREAS, Illinois tax dollars should be funding excellence
14 within this State's public higher education system; and

15 WHEREAS, Nationally, higher education is changing, and
16 there is a need for this State's higher education system to
17 strategically adapt in order to preserve, protect, and promote
18 the vital role it plays in the overall health of the State of
19 Illinois and the ability of any Illinois citizen to access
20 affordable education; therefore

21 **Be it enacted by the People of the State of Illinois,**
22 **represented in the General Assembly:**

1 Section 5. The Board of Higher Education Act is amended by
2 adding Sections 9.07a, 9.07b, 9.37, 9.38, 9.39, and 9.40 as
3 follows:

4 (110 ILCS 205/9.07a new)

5 Sec. 9.07a. Uniform admission process. The Board shall
6 establish a uniform admission process online, which must be
7 used at all public institutions of higher education. The goal
8 of this uniform admission process program is to ensure that no
9 matter which institution an applicant initially applies to, if
10 that institution denies the applicant acceptance, then the
11 applicant will be offered admission to another public
12 institution of higher education. This admission process must
13 include the following components:

14 (1) The Board shall create a uniform admission
15 application known as the "Common App", to be accepted at
16 all public institutions of higher education. The Board
17 shall make the Common App available online on the Board's
18 website. The Board shall inform all high schools in this
19 State of the availability of the Common App online, and
20 high school personnel shall provide this information to
21 students and their parents or guardian. Common App data
22 must be sent to all public universities. An applicant who
23 is not offered admission to a public university must be
24 automatically referred to the community college district

1 where the applicant resides and provided with enrollment
2 information from that district.

3 (2) If a public institution of higher education accepts
4 a person for admission to the institution, the person shall
5 receive a letter of acceptance from the institution, which
6 shall set forth any grant or scholarship offers extended by
7 the institution at that time. However, nothing shall
8 prevent the institution from subsequently enhancing such
9 grant or scholarship offers to the person.

10 (3) The process must be integrated such that if an
11 applicant is not accepted for admission to the public
12 institution of higher education that he or she applied to,
13 then the Board shall forward his or her Common App to other
14 public institutions of higher education whose admission
15 standards are reasonably in line with the applicant's
16 qualifications and who have programs and areas of study
17 that the applicant wishes to enroll in. However, the Board,
18 in so forwarding the Common App to an institution that
19 matches the applicant's qualifications and criteria, shall
20 also ensure that it maximizes the optimal efficiencies of
21 each academic department of an institution and each
22 institution itself by forwarding the Common App to
23 institutions with a goal of ensuring that departments and
24 institutions are operating with a critical mass of students
25 to operate efficiently. The Board shall also forward the
26 Common App to the community college district where the

1 applicant resides.

2 (4) All admission decisions, other than under Section
3 9.07b of this Act, shall be made by each public institution
4 of higher education, not the Board.

5 (110 ILCS 205/9.07b new)

6 Sec. 9.07b. Access to opportunity and automatic admission.
7 The Board shall, as part of the Common App created under
8 Section 9.07a of this Act, ensure that any high school student
9 in this State with a 3.0 cumulative grade point average or
10 better on a 4.0 scale (or the equivalent on a 5.0 scale)
11 receives access to the opportunity of higher education and
12 shall guarantee admission to a public university. The State
13 Board of Education shall cooperate with the Board to ensure
14 that each high school student in this State and his or her
15 parent or guardian is provided, at the high school level, with
16 the knowledge that the student will qualify for automatic
17 admission if he or she maintains a 3.0 cumulative grade point
18 average or better on a 4.0 scale (or the equivalent on a 5.0
19 scale) through graduation from high school. While a high school
20 student is not required to complete the Common App, all high
21 schools in this State shall provide the time, opportunity, and
22 guidance to fill out the Common App and a Free Application for
23 Federal Student Aid for any student wishing to do so. The Board
24 shall work with each public university and each public
25 university shall cooperate with the Board to ensure that each

1 high school student in this State with a 3.0 cumulative grade
2 point average or better on a 4.0 scale (or the equivalent on a
3 5.0 scale) is admitted to a public university that is in line
4 with that student's academic interests and that is academically
5 appropriate for that student.

6 (110 ILCS 205/9.37 new)

7 Sec. 9.37. 2017 Higher Education Strategic Centers of
8 Excellence Plan.

9 (a) As used in this Section, "campus" includes any campus
10 of a public university and public universities with only one
11 campus.

12 (b) The Board shall conduct a study of the academic
13 programs offered at each public university campus as follows:

14 (1) The Board shall conduct a survey that ranks the
15 departmental quality of each academic department on a
16 campus relative to corresponding departments at other
17 public university campuses. The Board shall rank each
18 academic program in relation to similar programs at other
19 campuses in this State.

20 (2) The Board shall specifically study programmatic
21 expansions, programmatic eliminations, and programs with
22 low enrollment.

23 (3) The Board shall examine those academic areas with
24 an opportunity for growth in relation to workforce demands.

25 (4) The Board shall produce a statement of excellence

1 for each campus, determining each campus's greatest
2 academic strengths and guiding the future mission and
3 priorities of each campus.

4 (5) The Board shall institute an economic efficiency
5 review of each campus and also of the top 8 ranked academic
6 departments statewide, as determined in paragraph (1) of
7 this subsection (b), in order to determine the optimal
8 level of student population at each campus and each of the
9 ranked departments, such that each campus and department is
10 operating at maximum efficiency. In completing the review,
11 the goal shall be to maximize the peak operating efficiency
12 of each campus and to enable sustainable and affordable
13 academic programs. The review shall include, but is not
14 limited to, the following:

15 (A) determining the number of students per
16 department necessary for that department to operate at
17 peak efficiency; and

18 (B) determining how many students per campus are
19 necessary for that campus to operate at peak
20 efficiency.

21 The Board shall include the following factors, without
22 limitation, when making its determination or evaluation
23 under subdivisions (A), (B), and (C) of this paragraph (5):

24 (i) fixed costs;

25 (ii) variable costs;

26 (iii) administrative overhead;

- 1 (iv) ongoing maintenance;
2 (v) labor costs;
3 (vi) the existing physical plant;
4 (vii) deferred maintenance;
5 (viii) on-campus housing availability, the demand
6 for and vacancy rates of such housing, the housing
7 opportunities available, and the appropriate mix of
8 students living on campus and off campus to determine
9 the campus's most efficient mix of student population;
10 (ix) procurement-related costs;
11 (x) the existing debt of the campus and whether the
12 campus would need to issue new debt in order to repair,
13 renovate, or create new programs or rehabilitate the
14 physical plant;
15 (xi) the impact on existing debt of the closure of
16 any department or program; and
17 (xii) any other factor that would bear on the
18 efficient operation of that particular campus or
19 departmental program in order to ensure that the campus
20 or department is operating at maximum efficiency.

21 Each public university shall prepare and present a
22 statement to the Board of what it considers to be the
23 university's areas of accomplishment and excellence within
24 the university. The Board must consider a university's
25 statement as part of the overall analysis involved in this
26 subsection (b). This statement may be supported by whatever

1 documentation the university wishes to present. Such
2 documentation may include, but is not required to, nor is
3 it limited to:

4 (I) departmental rankings from outside rankings
5 services;

6 (II) graduation rates;

7 (III) access to an underserved population;

8 (IV) job placement rates;

9 (V) a unique or specific program or qualification
10 of its faculty;

11 (VI) the relative value a student receives
12 relative to the price of his or her degree versus his
13 or her long-term earnings potential in his or her field
14 of study;

15 (VII) research areas and research grants; and

16 (VIII) any other factor the university believes
17 the Board should consider before making any
18 designation.

19 For departments that are not ranked in the top 8 pursuant
20 to paragraph (1) of this subsection (b), the Board shall
21 evaluate the demand for that departmental program in the
22 geographic region of the campus and whether continuing to
23 offer such a program will address an existing market
24 demand, provide access to an underserved population in that
25 region of the State, or address the future demand for that
26 offering in the reasonably foreseeable future.

1 (c) After completion of the study, the Board shall use the
2 results of the study to determine which academic programs
3 should be prioritized at each campus at a public university in
4 this State. In determining which academic programs should be
5 prioritized at which campuses, the Board shall, in addition to
6 the results of the study completed under subsection (b) of this
7 Section, consider all of the following factors:

8 (1) Maintaining enough academic programs at each
9 campus to keep all campuses of public universities in this
10 State open and operating at maximum efficiency.

11 (2) The ranking of each academic program at each
12 campus. The Board shall have a goal of maintaining, at a
13 minimum, the top 8 of each type of academic program.

14 (3) Geographic opportunity and access to programs of
15 all types.

16 (4) Diversity of demographic groups served by that
17 campus or department.

18 (5) Prioritizing available State funds to strengthen
19 and buttress successful and academically superior programs
20 while eliminating the subsidization of weaker academic
21 programs.

22 (6) Ensuring continued support for existing medical,
23 dental, pharmacy, nursing, or other health occupation
24 programs or departments.

25 (7) Ensuring that campuses ranked as R1 institutions in
26 the Carnegie Classification of Institutions of Higher

1 Education or a similar ranking of top research institutions
2 in the United States retain their ranking and designation;

3 (8) Maintaining science, technology, engineering, and
4 mathematics centers of excellence.

5 (9) The important role that regional universities play
6 in their region and in the overall economy of this State.

7 (10) Ensuring horizontal integration of teaching
8 resources across campuses.

9 (11) Establishing opportunities for vertical
10 integration between community colleges and public
11 universities.

12 (12) Distance learning to optimize educational
13 opportunity while controlling costs.

14 (13) The optimal student population of each campus,
15 with the Board determining enrollment levels necessary for
16 optimum efficiency.

17 The results of this review shall be used to create and
18 designate, by program, Higher Education Strategic Centers of
19 Excellence.

20 (d) The Board shall designate the Higher Education
21 Strategic Centers of Excellence under subsection (c) of this
22 Section within 18 months after the effective date of this
23 amendatory Act of the 100th General Assembly and shall report
24 its finding and actions required under this Section to the
25 General Assembly within 18 months after the effective date of
26 this amendatory Act of the 100th General Assembly, as provided

1 in Section 3.1 of the General Assembly Organization Act. The
2 report shall be re-evaluated as necessary, but no less than
3 every 3 years, to ensure that public universities have a
4 sustainable academic plan and that there is a balance of
5 academic programs throughout this State.

6 (e) The Board shall, with the Illinois Community College
7 Board, develop recommendations to integrate community colleges
8 into the plan established under subsection (c) of this Section
9 and shall have the authority to implement the recommendations
10 as necessary.

11 (110 ILCS 205/9.38 new)

12 Sec. 9.38. Evaluation of programmatic expansions and new
13 programs. In evaluating programmatic expansions and new
14 programs at public institutions of higher education, the Board,
15 prior to approving such expansions or new programs, shall make
16 the following findings:

17 (1) that such an expansion or new program is meeting an
18 unmet need in that region of the State or serving an
19 unserved or underserved population;

20 (2) in cases in which subdivision (1) of this Section
21 cannot be satisfied, that a market-demand analysis has been
22 performed to rationally justify that growth opportunity in
23 the area will be forthcoming in the immediate future;

24 (3) that the institution has the ability, if so
25 approved, to offer a quality program at a price point that

1 is cheaper for students than existing options elsewhere in
2 the area; and

3 (4) that the opening of such a program does not
4 negatively impact the optimal efficiency of the existing
5 higher education infrastructure in this State and that the
6 dedication of resources will not be at the expense of one
7 of the Higher Education Strategic Centers of Excellence
8 created in Section 9.37 of this Act.

9 (110 ILCS 205/9.39 new)

10 Sec. 9.39. Student financial aid study and reports.

11 (a) The Board shall study the opportunity for merit-based
12 financial aid to be awarded to students within the specific
13 budget of a public institution of higher education with the
14 goal of inducing students who would otherwise leave this State
15 to attend colleges and universities located inside this State
16 and increasing marginal revenue to the institution's campus.
17 This study must be completed on or before January 1, 2019. Upon
18 completion of the study, the Board shall report its
19 recommendations to the General Assembly as provided in Section
20 3.1 of the General Assembly Organization Act, including
21 specific recommendations on the creation of a statewide
22 merit-based financial aid program and how to pay for such a
23 program.

24 (b) The Board shall produce a report detailing the last 25
25 years of student financial aid grant programs funded by this

1 State to display factors indicative of a return on investment.
2 The report shall, at a minimum, include the following for each
3 State-funded grant program:

4 (1) the amount of State funding appropriated and spent
5 each year;

6 (2) the amount of private or non-State revenues also
7 supporting the program;

8 (3) student outcomes, including the number of program
9 graduates; and

10 (4) post-college data detailing how grant recipients
11 are currently benefiting this State.

12 This report must be submitted to the General Assembly, as
13 provided in Section 3.1 of the General Assembly Organization
14 Act, on or before January 1, 2019.

15 (c) This Section is repealed on January 1, 2020.

16 (110 ILCS 205/9.40 new)

17 Sec. 9.40. Multi-year budgeting study.

18 (a) The Board shall study the concept of multi-year
19 budgeting in order to bring stability and security to this
20 State's budgeting process so that public institutions of higher
21 education can better and more efficiently plan their internal
22 operations. The Board shall report specific recommendations on
23 multi-year budgeting to the General Assembly, as provided in
24 Section 3.1 of the General Assembly Organization Act, no later
25 than January 1, 2019.

1 (b) This Section is repealed on January 1, 2020.

2 Section 10. The University of Illinois Act is amended by
3 adding Section 100 as follows:

4 (110 ILCS 305/100 new)

5 Sec. 100. 2017 Higher Education Strategic Centers of
6 Excellence Plan. Notwithstanding anything in this Act to the
7 contrary, the University shall cooperate with the Board of
8 Higher Education and comply with any decisions made by the
9 Board of Higher Education with respect to this amendatory Act
10 of the 100th General Assembly. The University may not create
11 any new academic program without the approval of the Board of
12 Higher Education, as provided in Sections 7, 9.37, and 9.38 of
13 the Board of Higher Education Act.

14 Section 15. The Southern Illinois University Management
15 Act is amended by adding Section 85 as follows:

16 (110 ILCS 520/85 new)

17 Sec. 85. 2017 Higher Education Strategic Centers of
18 Excellence Plan. Notwithstanding anything in this Act to the
19 contrary, the University shall cooperate with the Board of
20 Higher Education and comply with any decisions made by the
21 Board of Higher Education with respect to this amendatory Act
22 of the 100th General Assembly. The University may not create

1 any new academic program without the approval of the Board of
2 Higher Education, as provided in Sections 7, 9.37, and 9.38 of
3 the Board of Higher Education Act.

4 Section 20. The Chicago State University Law is amended by
5 adding Section 5-195 as follows:

6 (110 ILCS 660/5-195 new)

7 Sec. 5-195. 2017 Higher Education Strategic Centers of
8 Excellence Plan. Notwithstanding anything in this Act to the
9 contrary, the University shall cooperate with the Board of
10 Higher Education and comply with any decisions made by the
11 Board of Higher Education with respect to this amendatory Act
12 of the 100th General Assembly. The University may not create
13 any new academic program without the approval of the Board of
14 Higher Education, as provided in Sections 7, 9.37, and 9.38 of
15 the Board of Higher Education Act.

16 Section 25. The Eastern Illinois University Law is amended
17 by adding Section 10-195 as follows:

18 (110 ILCS 665/10-195 new)
