1 AN ACT concerning plats.

Be it enacted by the People of the State of Illinois,represented in the General Assembly:

4 Section 5. The Plat Act is amended by changing Section 15 as follows:

6 (765 ILCS 205/1) (from Ch. 109, par. 1)

1. (a) Except 7 Sec. as otherwise provided in 8 subparagraph (b) of this Section whenever the owner of land subdivides it into 2 or more parts, any of which is less than 9 5 acres, he must have it surveyed and a subdivision plat 10 thereof made by an Illinois Registered Land Surveyor, which 11 plat must particularly describe and set forth all public 12 13 streets, alleys, ways for public service facilities, ways for utility services and community antenna television systems, 14 15 parks, playgrounds, school grounds or other public grounds, 16 and all the tracts, parcels, lots or blocks, and numbering all such lots, blocks or parcels by progressive numbers, 17 18 giving their precise dimensions. There shall be submitted simultaneously with the subdivision plat, a study or studies 19 20 which shall show topographically and by profile the elevation of the land prior to the commencement of any change in 21 22 elevations as a part of any phase of subdividing, and additionally, if it is contemplated that such elevations, or 23 the flow of surface water from such land, will be changed as 24 a result of any portion of such subdivision development, then 25 26 such study or studies shall also show such proposed changes in the elevations and the flow of surface water from such 27 land. The topographical and profile studies required 28 29 hereunder may be prepared as a subsidiary study or studies separate from, but of the same scale and size as the 30 31 subdivision plat, and shall be prepared in such a manner as

1 will permit the topographical study or studies to be used as 2 overlays to the subdivision plat. The plat must show all angular and linear data along the exterior boundaries of 3 the tract of land divided or subdivided, the names of all public 4 5 streets and the width, course and extent of all public 6 streets, alleys and ways for public service facilities. 7 References must also be made upon the plat to known and 8 permanent monuments from which future survey may be made and 9 the surveyor must, at the time of making his survey, set in such manner that they will not be moved by frost, good and 10 11 sufficient monuments marking the external boundaries of the tract to be divided or subdivided and must designate upon the 12 13 plat the points where they may be found. These monuments must be placed at all corners, at each end of all curves, at the 14 15 point where a curve changes its radius, at all angle points 16 in any line and at all angle points along a meander line, the points to be not less than 20 feet back from the normal water 17 elevation of a lake or from the bank of a stream, except that 18 19 when such corners or points fall within a street, or proposed 20 future street, the monuments must be placed in the right of 21 way line of the street. All internal boundaries, corners and 22 points must be monumented in the field by like monuments as 23 defined above. The county in which the land is located may 24 require that the surveyor provide geodetic survey horizontal control values for a minimum of 2 opposing corners of the 25 subdivision that are permanently monumented. Horizontal 26 27 control values must be provided in the Illinois State Plane Coordinate System in the zone as defined by each county and 28 29 referenced on the plat. Each county may specify levels of 30 positional accuracy for the horizontal control values of the 31 subdivision corners to be measured by the surveyor. The county may also require vertical control values referenced to 32 a statewide datum for a minimum of 2 opposing corners of the 33 34 subdivision that are permanently monumented. These monuments

1 2 of which must be of stone or reinforced concrete and must 2 be set at the opposite extremities of the property platted, 3 placed at all block corners, at each end of all curves, at 4 the points where a curve changes its radius, and at all angle 5 points in any line. All lots must be monumented in the field 6 with 2 or more monuments.

7 The monuments must be furnished by the person for whom 8 the survey is made and must be such that they will not be 9 moved by frost. If any city, village or town has adopted an 10 official plan, or part thereof, in the manner prescribed by 11 law, the plat of land situated within the area affected 12 thereby must conform to the official plan, or part thereof.

13 (b) Except as provided in subsection (c) of this 14 Section, the provisions of this Act do not apply and no 15 subdivision plat is required in any of the following 16 instances:

17 1. The division or subdivision of land into parcels 18 or tracts of 5 acres or more in size which does not 19 involve any new streets or easements of access and 20 provided also that this exemption does not invalidate any 21 local requirements applicable to the subdivision of 22 land.;

23 2. The division of lots or blocks of less than 1
24 acre in any recorded subdivision which does not involve
25 any new streets or easements of access <u>and provided also</u>
26 <u>that this exemption does not invalidate any local</u>
27 <u>requirements applicable to the subdivision of land.</u>*;*

The sale or exchange of parcels of land between
 owners of adjoining and contiguous land.;

30 4. The conveyance of parcels of land or interests
31 therein for use as a right of way for railroads or other
32 public utility facilities and other pipe lines which does
33 not involve any new streets or easements of access.;

34

5. The conveyance of land owned by a railroad or

other public utility which does not involve any new streets or easements of access.;

6. The conveyance of land for highway or other public purposes or grants or conveyances relating to the dedication of land for public use or instruments relating to the vacation of land impressed with a public use.;

7 7. Conveyances made to correct descriptions in
8 prior conveyances.

9 8. The sale or exchange of parcels or tracts of 10 land following the division into no more than 2 parts of 11 a particular parcel or tract of land existing on July 17, 12 1959 and not involving any new streets or easements of 13 access <u>and provided also that this exemption does not</u> 14 <u>invalidate any local requirements applicable to the</u> 15 <u>subdivision of land</u>.

16 9. The sale of a single lot of less than 5 acres 17 from a larger tract that does not involve any new streets or easements of access, when a survey is made by an 18 Illinois Registered Land Surveyor; provided, that this 19 20 exemption shall not apply to the sale of any subsequent 21 lots from the same larger tract of land, as determined by 22 the dimensions and configuration of the larger tract on 23 October 1, 1973, and provided also that this exemption does not invalidate any local requirements applicable to 24 the subdivision of land. 25

Nothing contained within the provisions of this Act shall 26 prevent or preclude individual counties from establishing 27 standards, ordinances, or specifications which reduce the 28 29 acreage minimum to less than 5 acres, but not less than 2 acres, or supplementing the requirements contained herein 30 when a survey is made by an Illinois Registered Land Surveyor 31 and a plat thereof is recorded, under powers granted to them. 32 33 For purposes of this subsection (b), the term "new

34 streets or easements of access" means any streets or

1 <u>easements of access established specifically to provide</u>
2 <u>access to parcels created pursuant to the exemptions</u>
3 <u>contained in this subsection.</u>

4 (c) However, if a plat is made by an Illinois Registered 5 Surveyor of any parcel or tract of land otherwise exempt from the plat provisions of this Act pursuant to subsection (b) of б 7 this Section, such plat shall be recorded. It shall not be the responsibility of a recorder of deeds to determine 8 whether the plat has been made or recorded under this 9 10 subsection (c) prior to accepting a deed for recording.
