

95TH GENERAL ASSEMBLY

State of Illinois

2007 and 2008

SB1257

Introduced 2/9/2007, by Sen. James F. Clayborne, Jr.

SYNOPSIS AS INTRODUCED:

New Act

Creates the Mold Remediation Registration Act. Requires the Department of Public Health to submit an annual report to committees of the General Assembly concerning the implementation of any federal regulations that establish: (1) scientific evidence concerning any health effects associated with fungi, bacteria, and their byproducts in indoor environments including any indoor air quality standard; and (2) standards for the training, certification, and licensing of parties providing mold remediation services in residential, public, and commercial buildings. Authorizes the Department to adopt rules concerning the Act, including rules to implement a program establishing procedures for parties that provide mold remediation services to register with the State and provide evidence of financial responsibility. Effective January 1, 2008.

FISCAL NOTE ACT
MAY APPLY

A BILL FOR

1 AN ACT concerning public safety.

2 **Be it enacted by the People of the State of Illinois,**
3 **represented in the General Assembly:**

4 Section 1. Short title. This Act may be cited as the Mold
5 Remediation Registration Act.

6 Section 5. Findings. The General Assembly finds that:

7 (1) Excessive indoor dampness in buildings is a
8 widespread problem that warrants action at the local,
9 State, and national levels.

10 (2) Because of the public's concern about the possible
11 public health effects of exposure to mold in buildings, as
12 well as the effects on workers performing remediation work,
13 and the costs of remediation for the property owner, there
14 is a need to identify parties performing mold remediation
15 in the State.

16 (3) Because there is a need to reduce moisture that
17 fosters mold formation in buildings, the State should
18 review current State building codes to ensure that they do
19 not foster mold.

20 (4) Parties providing mold remediation services in
21 residential, public, and commercial buildings in Illinois
22 should be required to register with the State and provide
23 proof of financial responsibility.

1 (5) Laboratories performing tests to confirm mold
2 contamination in buildings should be certified by the
3 American Industrial Hygiene Association using nationally
4 recognized accreditation standards set under the
5 Environmental Microbiology Laboratory Accreditation
6 Program.

7 Section 10. Definitions. As used in this Act:

8 "Department" means the Department of Public Health.

9 "Mold remediation" means the removal, cleaning,
10 sanitizing, demolition, or other treatment, including
11 preventive activities, of mold or mold-containment matter in
12 buildings.

13 "Preventative activities" include those intended to
14 prevent future mold contamination of a remediated area,
15 including applying biocides or anti-microbial compounds.

16 Section 15. Reporting requirement. The Department must
17 report to the Environment and Energy Committees of the House of
18 Representatives and the Senate, on an annual basis, concerning
19 the implementation of any federal regulations that establish:

20 (1) scientific evidence concerning any health effects
21 associated with fungi, bacteria, and their byproducts in
22 indoor environments including any indoor air quality
23 standard; and

24 (2) standards for the training, certification, and

1 licensing of parties providing mold remediation services
2 in residential, public, and commercial buildings.

3 Section 20. Rules. The Department may adopt rules, under
4 the Illinois Administrative Procedure Act, to implement and
5 administer the provisions under this Act. The rules may include
6 a program establishing procedures for parties that provide mold
7 remediation services to register with the State and provide
8 evidence of financial responsibility.

9 Section 99. Effective date. This Act takes effect January
10 1, 2008.
