

HB5828

98TH GENERAL ASSEMBLY

State of Illinois

2013 and 2014

HB5828

by Rep. Donald L. Moffitt

SYNOPSIS AS INTRODUCED:

210 ILCS 50/3.87

Amends the Emergency Medical Services (EMS) Systems Act. In a provision concerning rural ambulance service upgrades, provides that notwithstanding the service level of an ambulance, a first responder licensed by the Department of Public Health is authorized to function as a first responder.

LRB098 17201 RPS 52293 b

A BILL FOR

1 AN ACT concerning regulation.

2 **Be it enacted by the People of the State of Illinois,**
3 **represented in the General Assembly:**

4 Section 5. The Emergency Medical Services (EMS) Systems Act
5 is amended by changing Section 3.87 as follows:

6 (210 ILCS 50/3.87)

7 Sec. 3.87. Ambulance service upgrades and first responder
8 services; rural population.

9 (a) In this Section, "rural ambulance service provider"
10 means an ambulance service provider licensed under this Act
11 that serves a rural population of 7,500 or fewer inhabitants.

12 (b) A rural ambulance service provider may submit a
13 proposal to the EMS System Medical Director requesting approval
14 of either or both of the following:

15 (1) Rural ambulance service provider in-field service
16 level upgrade.

17 (A) An ambulance operated by a rural ambulance
18 service provider may be upgraded, as defined by the EMS
19 System Medical Director in a policy or procedure, as
20 long as the EMS System Medical Director and the
21 Department have approved the proposal, to the highest
22 level of EMT license (advanced life support/paramedic,
23 intermediate life support, or basic life support) held

1 by any person staffing that ambulance. The ambulance
2 service provider's proposal for an upgrade must
3 include all of the following:

4 (i) The manner in which the provider will
5 secure advanced life support equipment, supplies,
6 and medications.

7 (ii) The type of quality assurance the
8 provider will perform.

9 (iii) An assurance that the provider will
10 advertise only the level of care that can be
11 provided 24 hours a day.

12 (B) If a rural ambulance service provider is
13 approved to provide an in-field service level upgrade
14 based on the licensed personnel on the vehicle, all the
15 advanced life support medical supplies, durable
16 medical equipment, and medications must be secured and
17 locked with access by only the personnel who have been
18 authorized by the EMS System Medical Director to
19 utilize those supplies.

20 (C) The EMS System shall routinely perform quality
21 assurance, in compliance with the EMS System's quality
22 assurance plan approved by the Department, on in-field
23 service level upgrades authorized under this Section
24 to ensure compliance with the EMS System plan.

25 (2) Rural ambulance service provider in-field service
26 level upgrade. The EMS System Medical Director may define

1 what constitutes an in-field service level upgrade through
2 an EMS System policy or procedure. An in-field service
3 level upgrade may include, but need not be limited to, an
4 upgrade to a licensed ambulance, alternate response
5 vehicle as defined by the Department in rules, or
6 specialized emergency medical services vehicle.

7 (c) If the EMS System Medical Director approves a proposal
8 for a rural in-field service level upgrade under this Section,
9 he or she shall submit the proposal to the Department along
10 with a statement of approval signed by him or her. Once the
11 Department has approved the proposal, the rural ambulance
12 service provider will be authorized to function at the highest
13 level of EMT license (advanced life support/paramedic,
14 intermediate life support, or basic life support) held by any
15 person staffing the vehicle.

16 (d) A licensed first responder who is staffing an ambulance
17 operated by a rural ambulance service provider is authorized to
18 function at the first-responder level notwithstanding the
19 service level of the ambulance.
