HOUSE RESOLUTION

2

WHEREAS, Measles is a highly contagious respiratory disease that spreads easily through the air or on infected surfaces; it causes rash, high fever, cough, runny nose, and red watery eyes; people who are infected with measles can spread the virus for up to 4 days before developing symptoms; and

7

8

WHEREAS, Measles affect all organs of the body, and can cause serious and, in some cases, fatal complications in children, including pneumonia and encephalitis; and

10

11

WHEREAS, A non-immunized person or child has a 90% chance of getting the measles if they come in contact with an infected person; and

13

14

WHEREAS, The measles vaccine has been shown in numerous studies to be one of the most safe and effective vaccines available; and

16

17

WHEREAS, High immunization rates in a community will protect those who cannot be vaccinated, including children undergoing cancer treatment and infants under 12 months of age, who are at the highest risk of serious illness, hospitalization, or death due to measles; and

21

1 WHEREAS, The American Academy of Pediatrics, the Centers
2 for Disease Control and Prevention, and the American Academy of
3 Family Physicians all recommend that children receive the
4 measles, mumps, and rubella (MMR) vaccine at the age of 12-15
5 months, and again at 4-6 years; therefore, be it

6 RESOLVED, BY THE HOUSE OF REPRESENTATIVES OF THE
7 NINETY-NINTH GENERAL ASSEMBLY OF THE STATE OF ILLINOIS, that we
8 encourage the Illinois Department of Public Health to
9 promulgate administrative rules pursuant to the requirement
10 for health examinations and immunizations within the School
11 Code and to encourage higher rates of vaccinations and to
12 expedite this process in order to have such rules in place for
13 the 2015-16 school year; and be it further

14 RESOLVED, That a suitable copy of this resolution be
15 delivered to the Director of the Illinois Department of Public
16 Health.
