1

AN ACT in relation to environmental safety.

Be it enacted by the People of the State of Illinois,represented in the General Assembly:

Section 5. The Environmental Protection Act is amended
by changing Section 9.2 as follows:

6 (415 ILCS 5/9.2) (from Ch. 111 1/2, par. 1009.2)
7 Sec. 9.2. <u>Sulfur dioxide emission standards; review;</u>
8 amendments.

The Agency shall review all Illinois sulfur dioxide 9 (a) emission standards for existing fuel combustion stationary 10 emission sources located within the Chicago, St. Louis 11 12 (Illinois), and Peoria major metropolitan areas and, if 13 appropriate following such review, propose amendments to such standards to the Board by July 1, 1980, or within 90 days of 14 15 receipt of the initial reports required pursuant to Section 6.1 of this Act, whichever is later. The standards proposed 16 by the Agency shall be designed to enhance the use of 17 Illinois coal, consistent with the need to attain and 18 maintain the National Ambient Air Quality Standards for 19 20 sulfur dioxide and particulate matter.

(b) In granting any alternative emission standard or 21 22 variance relating to sulfur dioxide emissions from а coal-burning stationary source, the Board may require the use 23 Illinois coal as a condition of such alternative standard 24 of or variance, provided that the Board determines that Illinois 25 26 coal of the proper quality is available and competitive in 27 price; such determination shall include consideration of the cost of pollution control equipment and the economic impact 28 on the Illinois coal mining industry. 29
