The County Employees' and Officers' Annuity and Benefit Fund of Cook County (the "County Fund") and the Forest Preserve District Employees' Annuity and Benefit Fund of Cook County (the "Forest Preserve Fund") – combined, "the Total Fund" or "the Fund" – were established as public defined benefit plans on January 1, 1926 and July 1, 1931, respectively. Both are governed by the Illinois Pension Code, as amended (40 ILCS 5/9, 5/10). The funds are established to provide retirement, death, and disability benefits for Cook County and Forest Preserve District employees and their surviving spouses, children, and certain other dependents.

As of September 30, 2018, assets for the County Fund and Forest Preserve Fund totaled \$10.5 billion and \$208.2 million, respectively, which placed Total Fund assets at approximately \$10.7 billion. Of this amount, 15.9% of assets, or \$1.7 billion, was managed by Emerging Investment Managers. Although emerging manager assets of \$1.7 billion did not change from the year-ago period, utilization did improve marginally from 15.7% in September 2017.

Emerging Investment Manager Program Summary

On December 7, 2010, the Retirement Board ("the Board") of the Fund ratified diversity policies approved December 3, 2009 for investment services, including asset management, brokerage, and business services, as well as fiduciaries, consultants, and senior staff. Through these policies, the Fund affirms its ongoing commitment to Emerging Investment Manager utilization and complies with relevant Illinois legislation, including PA96-0006.

The Board established a policy for the utilization of Emerging Investment Managers that establishes operational guidelines and procedures for the Emerging Investment Manager program. The policy also adopts the County Fund's utilization goals and evaluation methodology for the Forest Preserve Fund.

The Fund established the policy to define the following program objectives:

Objectives

- Increase the utilization of Emerging Investment Managers;
- Proactively identify best-in-class Emerging Investment Managers who demonstrate the capacity to become long-term viable partners of the Fund;
- Maintain guidelines and funding strategies that encourage the inclusion and support the development of Emerging Investment Managers; and
- Employ prudent selection processes and practices consistent with the high fiduciary standards for all investment management decisions.

Framework

To meet these objectives and ensure that the Fund is proactive in its efforts to increase opportunities to the fullest extent feasible, the Fund has established two channels for sourcing and retaining Emerging Investment Managers: direct and indirect allocations. This approach allows the Fund to promote opportunities for high potential managers at various stages of organizational development, providing greater access to a wider pool of potential managers.

Goals

Consistent with PA96-0006 and the Fund's long-term strategy, goals were established as target ranges, initially set over a two-year horizon, and reviewed annually in line with asset allocation and rebalancing objectives. The purpose of this approach is to accommodate fluctuations in market values without forcing automatic rebalancing. In 2012, goals were revised upward as a result of Fund rebalancing activities. These same goals were reaffirmed by the Board in 2013. On October 2, 2014, domestic equity and fixed income utilization goals were revised upward as a result of additional Fund rebalancing activities. Effective August 2, 2018, fixed income and women utilization goals were revised upward due to the Fund's increased allocations to managers in both categories.

Emerging Investment Manager Exposure by Fund

The chart below details Emerging Investment Manager utilization rates for the County Fund, the Forest Preserve Fund, and the Total Fund as a percentage of the asset classes and of the respective funds. (The Forest Preserve Fund also maintains solely managed strategies for Emerging Investment Managers.)

¹ There were no international equity, fixed income, or alternatives emerging managers in the Forest Preserve Fund as of September 30, 2018.

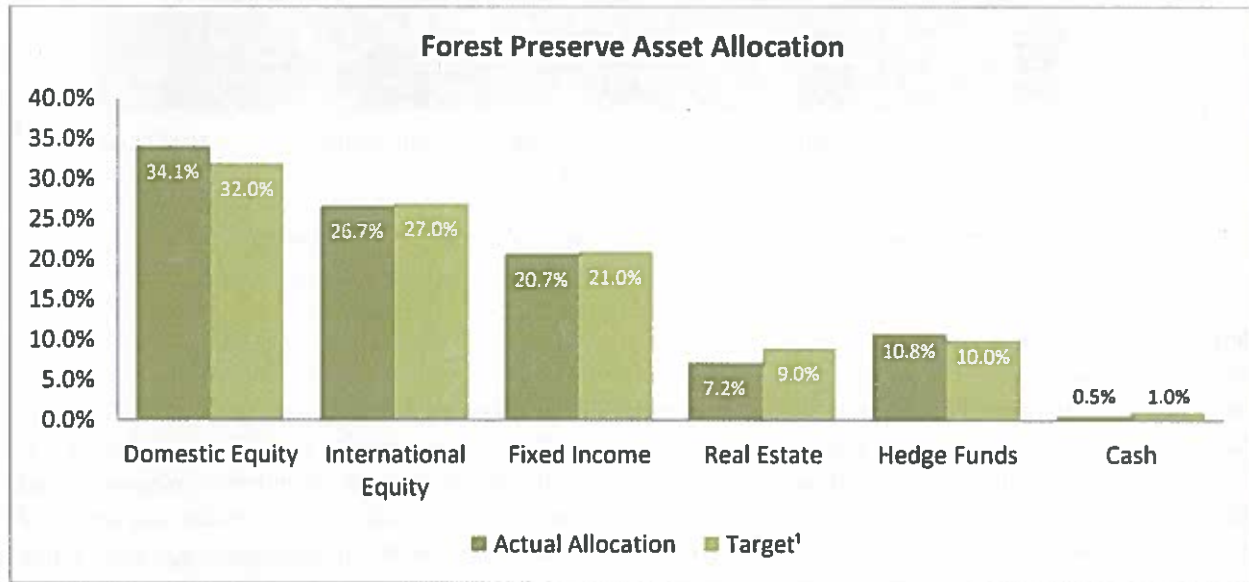

Asset/Liability Studies / Assumed Rate of Return

In 2016, asset liability studies were performed on both plans to assess funding shortfalls, cash management, and optimal asset allocations. The study confirmed the current asset allocation as the new target asset allocation for the Forest Preserve Fund as of July 1, 2016. In March 2017, current asset allocations for the Cook County Fund were also used as its new target allocation. Earlier in 2018, the Fund's Board of Trustees lowered the assumed rate of return from 7.50% to 7.25% as a result of a periodic actuarial review.

Rebalancing Activity

Using these asset/liability studies as a starting point, the Fund and its Investment Consultant reviewed its public market exposures to identify potential liquidity sources, return-enhancing opportunities and capacity for new emerging managers during 2017. The net impact of these reviews to emerging managers was positive as the Fund awarded a new mandate to a short duration fixed income MWDBE manager and graduated an international emerging manager from the Progress portfolio to a direct mandate within the Fund. These mandates were funded in 2018.

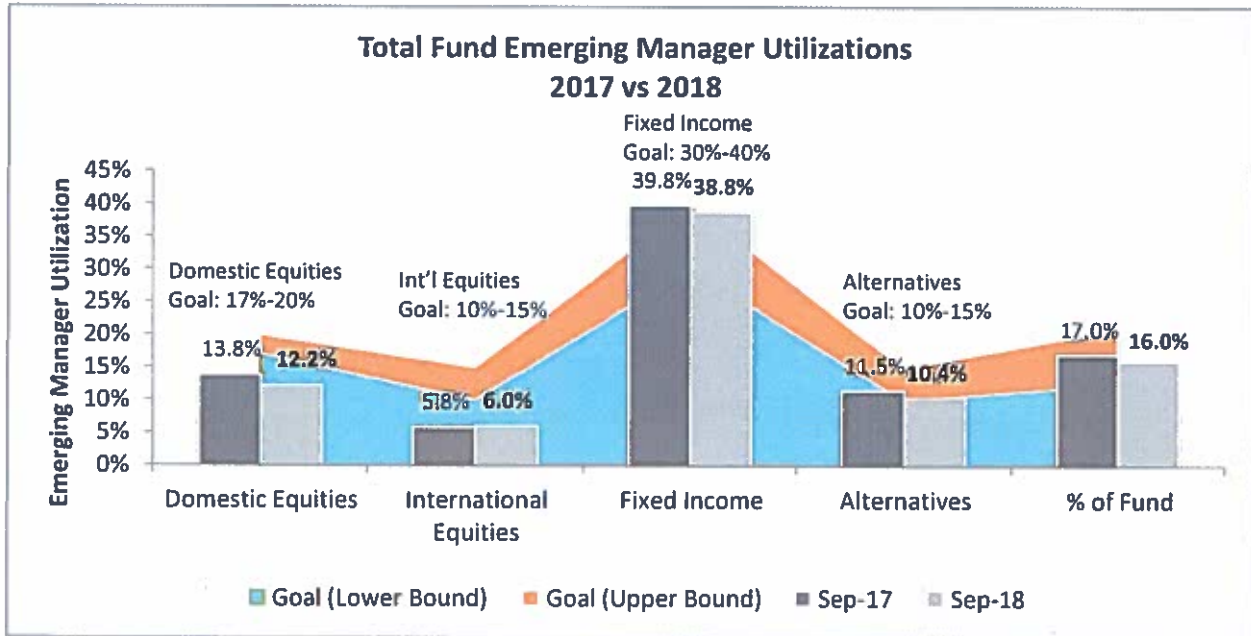

The Fund's current allocations with respect to its targets are reflected as follows.

¹ Reflects revised target asset allocation approved by the Board effective March 2017.

Emerging Investment Manager Utilization Summary

Year over year differences in manager utilization across asset classes is attributed to general market value impact, one termination, one graduation, re-allocations within the indirect portfolio, and liquidations to service benefit payments. Overall utilization declined from last year, and Fund rebalancing undertaken in November 2018 reduced utilization further to 15% as of early December. Some emerging manager assets were moved to reduce the Fund's small-mid cap equity exposure as well as to fund a new MWDBE, but non-emerging, fixed income manager. Though utilization is down from 2017, a real estate search conducted in 2018 and upcoming mandate funding is expected to improve emerging manager utilization by 1% when completed in 2019.

Results by Asset Class

Domestic Equities

The decrease in utilization was driven by a number of factors. First, Fortaleza Asset Management was terminated in December 2017, reducing domestic equity emerging manager AUM by approximately \$44M. Second, \$2.5M was transferred from Channing Capital in March 2018 to fund a new mandate with Garcia Hamilton, a minority-owned manager, for the Forest Preserve Fund. Lastly, strong relative outperformance from large cap stocks over small and mid-cap stocks resulted in a higher proportion of domestic equity assets managed by non-emerging managers. Large cap stocks are managed predominantly by the Fund's majority domestic equity managers. Conversely, 83% of the domestic equity emerging manager assets is in small- and mid-cap focused strategies, which underperformed compared to large caps for the period.

International Equity

The increase in utilization is due entirely to market effects, as there were no allocation shifts to emerging international equity managers for the period. However, the Fund graduated Strategic Global Advisors (SGA) to a direct mandate in October, adding an additional \$40 million in assets under SGA's management. This has the effect of raising utilization to 8.3% within international equities as of October 31, 2018.

Fixed Income

As with international equity, the change in fixed income utilization was due entirely to market effects. The slight decrease in utilization is the result of reduced fixed income valuations caused by rising U.S. interest rates. Garcia Hamilton & Associates, a minority-owned fixed income manager, was added to the Fund in March 2018. However, the firm is not considered emerging as they now manage assets exceeding \$10 billion.

Alternatives

The slight decrease in utilization was driven by an \$18 million reduction in emerging managers within the Fund’s hedge fund program, partially offset by a \$15 million private equity commitment.

The Fund participated in Emerging Investment Manager-focused conferences such as Grosvenor’s Small and Emerging Manager Conference. In October 2018, the Fund presented to the Senate Committee on Pensions and Investments on Emerging Investment Manager and MWD broker dealer utilization efforts.

As of September 30, 2018, the Fund directly engaged the services of Emerging Investment Managers through nine mandates, including Progress Investment Management, a manager-of-managers. This represents 23.0% of direct manager relationships, inclusive of Progress which is an MWDBE firm. Additionally, the Fund indirectly engages with 19 more via fund-of-fund platforms such as Progress and the Fund’s hedge fund and private equity programs. Emerging Investment Managers were represented in all of the Fund’s asset classes. One emerging investment manager maintained three separate mandates with the Fund.

As of September 30, 2018, the Fund’s investment program totaled \$10.7 billion. Actively managed strategies represented 63.5% of the Fund’s allocation with the remainder passively managed. As mentioned earlier, 16.0% of the Fund’s \$10.7 billion, or \$1.7 billion, was managed by Emerging Investment Manager firms. Emerging Investment Managers account for 25.2% of the Fund’s allocation to actively managed strategies, based on market values. Rhumblin, a non-emerging minority and woman-owned investment manager, manages 46.4% of the Fund’s allocation to passive strategies.

Emerging Broker/Dealer Program Summary

In 2018, the Fund continued to promote the utilization of Emerging Minority, Women and Disabled-Owned (MWD) broker dealers. Illinois Public Act 96-0006, approved by the Governor on April 3, 2009, declared it to be public policy of the State of Illinois to encourage the trustees of public employee retirement systems, pension funds, and investment boards to do the following:

- Use Emerging Investment Managers in managing their system’s assets, encompassing all asset classes;
- Increase the racial, ethnic, and gender diversity of its fiduciaries, to the greatest extent feasible within bounds of financial and fiduciary prudence; and
- Take affirmative steps to remove any barriers to the full participation in investment opportunities afforded by those retirement systems, pension funds, and investment boards.

On March 8, 2012, the Fund’s Board approved revised annual goals for MWD broker dealer utilization by asset class. These revised goals were subsequently reaffirmed on December 5, 2013 and again on October 2, 2014. This time frame provides for the review and evaluation of results by managers to determine the viability of goals, methods utilized by managers to achieve goals, and capabilities within each asset class of the various broker-dealers.

In fulfillment of the Emerging Investment Manager Program, the Board has established target range goals for the utilization of Emerging Investment Managers for the Funds' asset classes as well as for the utilization of Emerging Investment Managers. These goals are part of the Funds' long-term strategy consistent with its asset allocation and rebalancing objectives and will be reviewed annually.

For the purpose of this program, results will be reported on a combined basis for both Cook County and Forest Preserve Funds.

III. Policy and Process:

The Funds desire to promote opportunities for high potential managers throughout various stages of organizational growth and development.

To ensure that the Funds are proactive in efforts to increase opportunities to the fullest extent feasible, the Funds have established two channels for sourcing and retaining Emerging Investment Managers.

1. **Manager-of-Emerging Managers Portfolio:** Investment Managers that build and maintain portfolios of Emerging Investment Managers. These managers are called Fund-of-Fund Managers.

The purpose of utilizing Fund-of-Fund managers is to:

- Expand channels of access for Emerging Investment Managers to the Fund.
- Create opportunities consistent with the Funds' asset allocation to enhance placements.

Investment Staff works with the Fund-of-Fund Managers to identify and retain Emerging Investment Managers with the expressed objective of direct placement opportunities with the Fund. The Fund-of-Fund Managers retain discretion for the selection of Emerging Investment Managers meeting criteria established mutually by the Investment Staff, the Investment Consultant and approved by the Emerging Manager Investment Sub-Committee (EMIC). Portfolio construction will be determined by the Funds' asset allocation in accordance with the guidelines and risk parameters established for the portfolio.

Consideration for direct placement from the Manager-of-Emerging Managers portfolio will be based on the Emerging Investment Manager's ability to meet key criteria as established by the EMIC. Such criteria may include ability to meet Funds' compliance and contractual requirements, performance track record, growth of institutional platform and business sustainability. Placement will be made according to the needs of the Funds in compliance with allocation and rebalancing objectives.

2. Direct Mandates: This is where the Funds would have direct relationships with individual Emerging Investment Managers. The purpose of direct mandates is to:
 - Continue to identify and utilize best-in-class Emerging Investment Managers to provide enhanced investment returns to the Funds.
 - Promote the full participation of Emerging Investment Managers in investment opportunities afforded by the Funds.

The Funds will source candidates for direct mandates utilizing searches as defined by the procurement policy and authorized by the Investment Committee (or by recommendation of EMIC). Further, if an Emerging Investment Manager meets the criteria established by the Board for a specific search then the Emerging Investment Manager shall receive an invitation from the Board to present for final consideration of the contract. In the case where multiple Emerging Investment Managers meet the criteria of the search, the Investment Staff may choose the most qualified firm or firms to present to the Board. Candidates may also be sourced from the Manager-of-Emerging Managers portfolio according to their ability to meet criteria as stipulated for the mandate.

With the direction of the EMIC, Investment Staff will provide continuous monitoring and evaluation of candidates in the portfolio and make recommendations pursuant to the Emerging Investment Manager designations as appropriate.
